

ARTICLES

Jushan Bai Estimating Multiple Breaks One at a Time	315
Robert M. de Jong Central Limit Theorems for Dependent Heterogeneous Random Variables	353
Hassan Arvin-Rad Comparison of Deterministic and Stochastic Predictors in Nonlinear Systems When the Disturbances Are Small	368
Steven Stern Approximate Solutions to Stochastic Dynamic Programs	392
Anoop Chaturvedi, Hikaru Hasegawa, Ajit Chaturvedi, and Govind Shukla Confidence Sets for the Coefficients Vector of a Linear Regression Model with Nonspherical Disturbances	406
Ludger Overbeck and Tobias Rydén Estimation in the Cox–Ingersoll–Ross Model	430

PROBLEMS AND SOLUTIONS

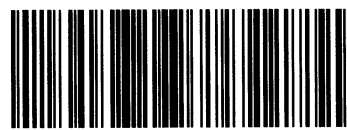

PROBLEMS

Badi H. Baltagi and Walter Krämer A Simple Linear Trend Model with Error Components	463
Enrique Sentana Estimation of a Triangular, Seemingly Unrelated, Regression System by OLS	463
Shuangzhe Liu and Wolfgang Polasek Two Matrix Inequalities Involving the Moore–Penrose Inverse	463
Heinz Neudecker An Inequality Concerning the Hadamard Matrix Product	464
S.K. Sapra Equivariance of an Instrumental Variable (IV) Estimator in the Linear Regression Model	464

SOLUTIONS

Oliver Linton Kernel Regression with “No” Information	464
J. Roderick McCrorie Global Concavity of the Likelihood Functions for Two Binary Choice Models	465
T.W. Anderson Generalization of a Matrix Inequality	466
