This multi-disciplinary journal is devoted to the publication of original, empirical, theoretical and review papers which address the inter-relationship of normal and pathological development in adults and children. It is intended to serve the field of developmental psychopathology, which strives to understand patterns of adaptation and maladaptation throughout the lifespan. This journal is of interest to psychologists, psychiatrists, social scientists, neuroscientists, paediatricians and researchers.

REVIEW ARTICLES
Cortisol and depression: three questions for psychiatry
Herbert J 449

Global variation in the prevalence and incidence of major depressive disorder: a systematic review of the epidemiological literature

ORIGINAL ARTICLES
The cortisol awakening response predicts major depression: predictive stability over a 4-year follow-up and effect of depression history
Vinski-K-Schallhorn S, Doane LD, Minaki S, Zinbarg RE, Craske MG & Adam EK 483

Effects of cortisol on memory in women with borderline personality disorder: role of co-morbid post-traumatic stress disorder and major depression

Differential functional connectivity within an emotion regulation neural network among individuals resilient and susceptible to the depressiveogenic effects of early life stress
Cisler JM, James GA, Tripathi S, Mletzko T, Heim C, Hu XP, Mayberg HS, Nemeroff CB & Kilts CD 507

Intergenerational transmission of maltreatment and psychopathology: the role of antenatal depression
Plant DT, Barker ED, Waters CS, Pawlby S & Pariante CM 519

Diagnosis and treatment of depression following routine screening in patients with coronary heart disease or diabetes: a database cohort study
Burton C, Simpson C & Anderson N 529

Increased salience of gains versus decreased associative learning differentiates bipolar disorder from schizophrenia during decision-making

Parental schizophrenia and increased offspring suicide risk: exploring the causal hypothesis using cousin comparisons

Speed of facial affect intensity recognition as an endophenotype of first-episode psychosis and associated limbic-cortical grey matter systems
Dean AM, Goodby E, Ooi C, Nathan PJ, Lennox BP, Sere At, Shahar S, Buckling J, Jones PB, Bullore ET & Barnea A 591

Sensory-based and higher-order operations contribute to abnormal emotional prosody processing in schizophrenia: an electrophysiological investigation
Piñeiro AP, del Re E, Mazo J, Nestor PG, Rabher A, McCarthy MW, Gonzales OP & Nitkaiewicz MA 603

MAPK14 and CNR1 gene variant interactions: effects on brain volume deficits in schizophrenia patients with marijuana misuse
Oneuwamnna OE, Nam KN, Epping EA, Wassman TH, Zabeil S, Andreason NC & Ho B-C 619

Maternal separation in childhood and diurnal cortisol patterns in mid-life: findings from the Whitehall II study
Kumar M, Haas J, Bartley M, Stansted S & Kumar M 633

Anterior cingulate cortical thickness is a stable predictor of recovery from post-traumatic stress disorder
Dicker EW, Brunet A, Aran Y & Armony JL 645

The association between social stress and global cognitive function in a population-based study: the European Prospective Investigation into Cancer (EPIC)-Norfolk study

BOOK REVIEW
Psychiatry and Clinical Neuroscience: A Primer
