

# CLAY MINERALS

VOLUME 17, NUMBER 1, MARCH 1982

## CONTENTS

Clays in the discovery and recovery of petroleum	1
C. V. JEANS. Introduction	3
A. HURST and H. IRWIN. Geological modelling of clay diagenesis in sandstones	5
W. J. MCHARDY, M. J. WILSON and J. M. TAIT. Electron microscope and X-ray diffraction studies of filamentous illitic clay from sandstones of the Magnus Field	23
K. A. MORRIS and C. M. SHEPPERD. The role of clay minerals in influencing porosity and permeability characteristics in the Bridport Sands of Wytech Farm, Dorset	41
U. SEEMANN. Depositional facies, diagenetic clay minerals and reservoir quality of Rotliegend sediments in the Southern Permian Basin (North Sea): a review	55
N. C. ROSSEL. Clay mineral diagenesis in Rotliegend aeolian sandstones of the southern North Sea	69
M. J. FISHER and C. V. JEANS. Clay mineral stratigraphy in the Permo-Triassic red bed sequences of BNOC 72/10-1A, Western Approaches, and the south Devon coast	79
D. O. LAMBERT-AIKHIONBARE and H. F. SHAW. Significance of clays in the petroleum geology of the Niger Delta	91
C. V. JEANS, R. J. MERRIMAN, J. G. MITCHELL and D. J. BLAND. Volcanic clays in the Cretaceous of southern England and Northern Ireland	105
Book Reviews	157

*Published by The Mineralogical Society, 41 Queen's Gate, London SW7 5HR*  
*Printed and bound in Great Britain by Spottiswoode Ballantyne Limited,*  
*Colchester and London*
