The Weed Science Society of America publishes original research and scholarship in the form of peer-reviewed articles in three international journals. Weed Science is focused on understanding "how" weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports. Topics for *Weed Technology* include all aspects of weed management in agricultural, horticultural, ornamental, forestry, aquatic, turf, recreational, rights-of-way, and other settings; weed resistance to herbicides; herbicide resistant crops; biological weed control agents; new weed management techniques; impacts of weed competition with crops; vegetation management with plant growth regulators; weed surveys; weed-related grower surveys; education; and extension. Symposia papers and reviews are accepted. Consult the editor for additional information.

### Associate Editors (Assignment Year)

- **Jason Bond**, Stoneville, MS (2020)
- **Terry Dittrich**, Ames, IA (2013)
- **Janis McFarland**, Pullman, WA (2013)
- **Dallas Peterson**, Pullman, WA (2017)

### Officers of the Weed Science Society of America

- **President**
  - Kevin Bradley, Columbus, MO (2012)
- **President-Elect**
  - Bradd Hanson, Davis, CA (2013)
- **Past President**
- **Past President**
  - Aaron Hager, Urbana, IL (2012)
- **Executive Director**
  - Thomas H. Anderson, Stoneville, MS
- **Secretary**
  - Tracy Candelaria, Managing Editor
- **Treasurer**
  - Michael Walsh, Crawley, Australia

### Membership

Membership includes online access to *Weed Science, Weed Technology, Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 30 East 10th St., PO Box 7065, Lawrence, KS 66044-7065 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

### Subscription Information

Membership includes online access to *Weed Science, Weed Technology, Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 30 East 10th St., PO Box 7065, Lawrence, KS 66044-7065 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

### Cover

Cover crops like oilseed radish (*Raphanus sativus* L.) are increasing in popularity in many corn and soybean production systems throughout the U.S. Research conducted across 3 seasons in Missouri showed that oilseed radish is one of the most sensitive cover crop species to common herbicides used in the previous corn or soybean crop. For more information, see article in this issue entitled, "Carryover of Common Corn and Soybean Herbicides to Various Cover Crop Species." Photo by Kevin Bradley.
