Aims and Scope: The International Journal of Technology Assessment in Health Care has as its specific scope of interest the assessment of medical technologies to support health policy or practice decisions, or discuss methods of assessing such technologies; please see Journal Aims and Scope for details. Manuscripts are accepted by the Editor in Chief and the Editorial Board. Those that pass review to an international review process, which usually is completed within 4 to 10 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, capitalization, and punctuation should conform to the 15th Edition of The Chicago Manual of Style (University of Chicago Press). Manuscript Submission and Review: All manuscript submissions to the International Journal of Technology Assessment in Health Care must be made electronically via ScholarOne Manuscripts, at the website:
http://mc.manuscriptcentral.com/thc
Please follow the detailed instructions on the website to avoid delays. The authors are asked to provide contact information and they may suggest reviewers. The website automatically acknowledges receipt of the manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must quote manuscript reference number and should be sent by email to the Editorial Office at EDITAR@st.helens.ac.uk.

Preparation of Manuscript: The manuscript, including all references, must be provided in Word or RTF format, double spaced on 8½ × 11 inch margins. Manuscripts should typically have less than 4,000 words, including the abstract of 250 words maximum, and usually no more than 25 references. Manuscripts should be arranged as follows: 1) cover sheet with title and short title; 2) abstract and keywords; 3) acknowledgments, including source of funding; 4) text; 5) references; 6) tables with titles, and 7) figures, with captions on a separate page. The Journal accepts manuscripts whose products are discussed in the paper or their competitors; such information will not be revealed to reviewers but may be included in a suitable format in the final publication if the manuscript is accepted.

Computer diagnosis and results.

The Journal welcomes submissions of articles that evaluate health technologies to support health policy or practice decisions, or discuss methods of assessing such technologies; please see Journal Aims and Scope for details. Manuscripts are accepted by the Editor in Chief and the Editorial Board. Those that pass review to an international review process, which usually is completed within 4 to 10 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Computer diagnosis and results.

The cover sheet should list 1) the article’s full title; 2) a short title (30 characters or less) for the running head; 3) the name of the corresponding author and her/his complete mailing address; 4) telephone number, and 5) e-mail address.

Abstract and Keywords. A 100- to 250-word abstract, submitted on a separate page, should summarize the objectives of the study or analysis. The abstract’s major arguments and/or results, and its conclusions/recommendations. Abstracts must be submitted in four sections: Objectives; Methods; Results; and Conclusions, except where the subject or format of the article does not permit. Three to five key words, using terms from the Medical Subject Headings (from Medline), should follow the abstract.

References and Notes. The references must be arranged according to the ICMJE Uniform Requirements for Manuscripts (URM); numbered consecutively in the text, cited in order of their first appearance, in sequence: (1) references; (2) text; (3) acknowledgments, including source of funding; (4) tables with titles, and (5) figures. The cover sheet should list 1) the article’s full title; 2) a short title (30 characters or less) for the running head; 3) the name of the corresponding author and her/his complete mailing address; 4) telephone number, and 5) e-mail address.
