The British Journal of Nutrition is an international, peer-reviewed journal publishing original papers, review articles, short communications and technical notes on nutrition and related fields in human and animal nutrition. Correspondence is encouraged in a Nutrition Discussion Forum. The journal recognizes the multidisciplinary nature of nutritional science and encourages the submission of material from all of the specialties involved in research and clinical practice. The journal also publishes supplements on topics of particular interest.

The British Journal of Nutrition is published twice monthly by Cambridge University Press on behalf of The Nutrition Society. The British Journal of Nutrition is available online to subscribers at journals.cambridge.org/bjn Tables of contents and abstracts are available free at the same website.

Editor-in-Chief
C C Berding, University of Southampton, UK
Deputy Editors
J B Anderson, University of North Carolina, USA
A F Beutler, Florida University Hospital, USA
D Black, Sheldon University, Australia
D Huttlin, DFGU, USA
M John, University of Reading, UK
D M McKendry, Texas A&M, USA
A Mathews, University of New England, USA
D P Pinney, University of Alberta, Canada
W P resistor, Research Unit, USA
E Rash, Journal of the Science of Food and Agriculture, USA
K Deighton, University of Science, New Zealand
M Miotto, Double University, Australia
R Thompson, University of Sydney, Australia
D Topping, CSIRO, Australia
Reviews and Honours Editor
R A Hilding, University of Surrey, UK
Supplements Editors
M Mackley, Queen's Research Institute, Canada
Statisticians
V Y Doll, Duke University, USA
S Baron, University of Southampton, UK
G Collum, University of North Carolina, USA
J C Combs, University of British Columbia, Canada
D Durr, Murdoch University, Australia
K Miller, Monash Medical Centre, Australia
L Kelley, West Virginia University, USA
D L Ng, Monash University, China
W Qia, Brigham and Woman's Hospital, USA
C Rizzi, University of Copenhagen, Denmark
J Turek, CSIRO, Australia
M Smidt, FREDYK Centrum Brain, German Research Center for Environmental Health, Germany
M Wormald, Flinders University, Australia
C Yan, Harvard School of Public Health, USA

Editorial Board
K Eriksson, University of California: Davis, USA
J Gallacher, Institut National de la Recherche Agronomique, France
A. Ah, University of Osaka, Japan
T Hill, University of Virginia, USA
M Keppler, University of Laval, Canada
M Kozlowski, University of Guelph, Canada
K Rehfeld, Aarhus University, Denmark
S Roll, University of Copenhagen, Denmark
J Sunohara, Agriculture and Agri-Food Canada, Canada
L Laurinseth, University of Copenhagen, Denmark
M Lauron, University of Wuhan, USA
D Lebret, Sorbonne, USA
J Lodge, Northern University, Canada
C Malmberg, University of North South Wales, Australia
M Marston, Melbourne University, Australia
H Nakamura, University of Tokyo, Japan
S Nakazawa, University of Osaka, Japan
A Pals, University of the Basque Country, Spain
E Powneke, Royal Veterinary School, UK
L P rice, University of Aberdeen, New Zealand
M Poole, University of Sheffield, Canada
M Perrin, University of the Basque Country, Spain
A Perrier, University of Medicine, Canada
D Robertson, University of Surrey, UK
S Sakamoto, Medical Research Council, UK
C Schubert, University of Eastern Poland, Poland
R Schlaug, Hopkins University, USA
J Smith, University of Adelaide, Australia
A Sneddon, Imperial Research Institute, UK
J Suta, University of Trondheim, Spain
K Sudhamsamran, University of Malaysia, Canada
M Wadum, University of Auckland, New Zealand
R Waagbø, NUFFE International, Norway
M Wee, CSIRO, Australia
J Wang, Chinese Academy of Agriculture, China
G Williamson, University of Leeds, UK

Molecular Nutrition
Statistical analysis of human microarray data shows that dietary intervention with \( n \)-3 fatty acids, flavonoids and resveratrol enriches for immune response and disease pathways
A. Warburton, O. Vasieva, P. Quinn, J. P. Stewart & J. P. Quinn 239-249

Human and Clinical Nutrition
Effects of postprandial fruit supplementation on anthropometric indices, glycemic control, blood pressure, lipid profile, insulin resistance and appetite in patients with the metabolic syndrome: a randomized clinical trial
A. J. Hutter, O. Vasieva, M. J. Maynard & S. Safdar 250-259
Replacing carbohydrates during a glucose challenge with the egg white portion or whole egg products protects against postprandial impairments to vascular endothelial function in preclinical models: role of dietary increase in plasma and lipoprotein
Non-OGTT methodology and the impact on adult microendocrine- related outcomes: a randomized trial of maternal DHA supplementation in pregnancy
Effect of long-term nutraceutical and dietary supplement use on cognitive function: a 10-year prospective review of randomized controlled trials
Prevalence and determinants of vitamin D deficiency in the Third National Health and Nutrition Examination Survey: NHANES III

Prenatal vitamin D status and offspring’s growth, adiposity and metabolic health: a systematic review and meta-analysis
C. Santamarina, M. G. B. L. L. Leke, N. J. D. Crozier, P. investigators, 2-3, C. Liu, F. Andreati, B. A. N. Negel & D. D. We 300-329

Dietary Surveys and Nutrient Epidemiology
Diet patterns and the association with vitamin D and lutein concentrations throughout pregnancy: a prospective cohort study

Is dietary macronutrient composition during pregnancy associated with offspring birth weight? A observational study
Does adherence to the World Cancer Research Fund/American Institute of Cancer Research cancer prevention guidelines reduce risk of colorectal cancer in the US women’s cohort study? more evidence needed to confirm benefit
F. Z. Ismen, I. C. Cede, R. F. Evans, N. N. Nuclear & S. Conroy 340-349

Behaviour, Appetite and Obesity
Cognitive enhancement in old dogs from dietary supplementation with a nutrient blend containing arginine, antioxidants, B vitamins and fish oil
Y. Pan, A. D. Kennedy, T. J. Jönsson & N. W. Milgram 349-358

Dietary Surveys and Nutrient Epidemiology
Dietary patterns and their association with adiponectin and leptin concentrations throughout pregnancy: a prospective cohort study

Is dietary macronutrient composition during pregnancy associated with offspring birth weight? A observational study
Does adherence to the World Cancer Research Fund/American Institute of Cancer Research cancer prevention guidelines reduce risk of colorectal cancer in the US women’s cohort study? more evidence needed to confirm benefit
F. Z. Ismen, I. C. Cede, R. F. Evans, N. N. Nuclear & S. Conroy 380-389
