Supplement to Parasitology 1993

Human nutrition and parasitic infection

EDITED BY D. W. T. CROMPTON

CO-ORDINATING EDITOR L. H. CHAPPELL

CAMBRIDGE UNIVERSITY PRESS
Subscriptions may be sent to any bookseller or subscription agent or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011–4211. All orders must be accompanied by payment. The subscription price of volumes 106 and 107, 1993 is £225 (US $440 in the USA, Canada and Mexico), payable in advance, for ten parts plus supplements; separate parts cost £20 or US $40 each (plus postage). Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to Parasitology, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573–9864.

Parasitology

Volume 107  Supplement 1993

Human nutrition and parasitic infection

EDITED BY
D. W. T. CROMPTON
Contents

Preface
List of contributions
Foreword

Human nutrition needs and parasitic infections
Introduction
Human energy requirements
Proteins
Proportions of major energy sources in the diet
Micronutrients
References

Pathways to the impairment of human nutritional status by gastrointestinal pathogens
Summary
Introduction
The nature of human nutritional status and its assessment
The nutrients
Nutritional status and nutrient deficiency
Nutrient requirements and recommendations
The interaction of nutrition and infection
Epidemiology of diarrhoeal illness and intestinal parasitosis
Diarrhoea in infants and young children
Intestinal parasitism in the population
Diarrhoea and parasitism in immunocompromised hosts
Mechanisms of nutrient loss and malnutrition in intestinal infections
Malnutrition
Intestinal pathogens associated with nutrient loss
Viruses
Bacterial pathogens
Protozoal pathogens
Helminthic pathogens
Conclusion
References

Diarrhoeal disease in early childhood: experiences from Sierra Leone
Summary
Introduction

Clinical features and definitions of acute and persistent diarrhoea and dysentery
Enteric pathogens in diarrhoeal diseases
Pathogenesis of Diarrhoea
Interventions for reducing mortality/morbidity amongst under-fives from diarrhoeal diseases
Case management
Appropriate feeding
Chemotherapy
Increasing host resistance
Measles immunization
Rotavirus immunization
Shigella spp. and ETEC
Cholera immunization
Reducing transmission of pathogens
Experiences from Sierra Leone
Diarrhoeal disease-associated morbidity and mortality in children under five years of age in Freetown, Sierra Leone
Case management in Sierra Leone
Increasing host resistance in Sierra Leone
Reducing transmission of pathogens in Sierra Leone
Identification of epidemics and implementation of control in Sierra Leone
Conclusion
Acknowledgements
References

Nutrition support and the human immunodeficiency virus (HIV)
Summary
Introduction
Clinical symptomatology
Relationship of malnutrition and disease
Prevalence
Hospital
Outpatient
Predicting death
Malnutrition
Body composition
Energy expenditure in AIDS
Energy expenditure: pre-AIDS to AIDS
Substrate utilization
Lipid metabolism and cytokines
Selecting the optimal diet
Nutrition assessment and requirements
Oral diet
Tube feeding diets
Parenteral nutrition
Contents

- Non-intervention studies
- Non-randomized intervention studies
- Randomized intervention studies
- Lactose tolerance
- Vitamins and protein
- Discussion
- Acknowledgements
- References

Hookworm infections and human iron metabolism

Summary
Introduction
Life history of hookworms
Epidemiology of hookworm infections
Human iron status and anaemia
Hookworm feeding activity and human blood loss
A provisional model for hookworm anaemia
References

Filariasis: nutritional interactions in human and animal hosts

Summary
Introduction
Effect of human infections on growth and mortality
Studies on experimental rodent filariasis
Onchocerciasis, vitamin A and experimental filariasis
Other deficiencies
Conclusions
References

Parasitic infection and chronic energy deficiency in adults

Introduction
Defining chronic undernutrition in adults
Morbidity and mortality in adult undernutrition
Parasitic infections and adult undernutrition: associations and consequences
Adult malnutrition — a causative factor in parasitic infections?
Parasitic infections — a causative factor in adult malnutrition?
Adult malnutrition, parasitic infections and work productivity
Nutritional repletion and reactivation of parasitic infection in malnourished adults
Alteration in pharmacodynamics of drugs in adult malnutrition
Conclusions
Acknowledgements
References

Energy requirements in human pregnancy, in human nutrition and parasitic infection

Summary
Introduction
Energy cost of pregnancy
Energy intakes
Possibility of energy savings
The influence of parasitic infection
Conclusion
Acknowledgement
References

Nutritional and physiological consequences of tumour glycolysis

Summary
Introduction
Glycolysis in tumour cells
Changes in enzyme and metabolite patterns
Enhanced glucose uptake
Lack of a Pasteur effect and mitochondrial content
Modulation of tumour glycolysis by ATP
Activity of the NADH shuttles
Role of lactate transport
Other pathways of glucose metabolism: the glycolytic bypass
Other sources of lactate
Role and regulation of glycolysis and the parasitic nature of tumour cells
Glucoseogenesis in the host
Mechanisms of the gluconeogenic increase
Glucoseogenesis and cancer cachexia
Approaches to treatment using the glucose/lactate cycle
Hexose analogue glycolytic inhibitors
Lactate transport inhibitors
Inhibitors of host glucoseogenesis
Nutritional manipulations
Carbohydrate deprivation
Hyperalimentation
Summary of Cori cycle-based cancer treatments
Summary: tumours as glycolytic parasites
References

Infection, nutrition and cognitive performance in children

Summary
Introduction
Intelligence, cognition and mental processes
Cognition and intelligence
Information processing
IQ and DQ
Malnutrition, development and psychological function
Undernutrition — PEM
Correlational studies
Intervention studies
