This journal is included in the Cambridge Journals Online service which can be found at journals.cambridge.org. For further information on other Press titles go to http://www.cambridge.org.

Scope and contributions
International Psychogeriatrics is written by and for those doing, clinical, teaching, and research work with older people. It is the official journal of the International Psychogeriatric Association (IPA) and is published by Cambridge University Press, Cambridge, UK. Although it is primarily concerned with psychogeriatrics, the journal welcomes contributions from all concerned with the field of mental health and aging. Original research papers are particularly welcome.

Contributions include original research articles, reviews of the literature, book reviews, letters to the editor, and editorials. Apart from editorial and book reviews, which are commissioned, contributions to International Psychogeriatrics are spontaneously received and submitted by authors. Papers are usually reviewed by two expert reviewers selected by the Editor-in-Chief. As present, about one-third of the papers submitted are accepted for publication. The Journal’s Science Citation Index impact factor is 2.427 (2016). Submission of a paper implies that it is neither under consideration for publication elsewhere, nor previously published in English. Manuscripts must be formatted double-spaced with ample margins on all sides and the pages should be numbered. International Psychogeriatrics uses the spelling of American English. Manuscript written by those whose primary language is not English should be edited carefully for language prior to submission. The journal has a Language-Assistance Panel consisting of British native English-speakers willing to check manuscripts only for prior to submission, and bilingual experts willing to assist with the translation of manuscripts into English. Further details including contact information for individual panel members can be found at both the journal and IPA website: journals.cambridge.org/ipg and ipaj-ed@cambridge.org. An up to date version of the journal’s instructions for contributors can be found at the International Psychogeriatrics website: journals.cambridge.org/ipg. Please read these instructions carefully before submitting articles. Articles that are not prepared in accordance with these guidelines will be returned to authors.

Manuscripts should be submitted online via our manuscript submission and tracking site, http://mc.manuscriptcentral.com/ipg. Full instructions for electronic submission are available directly from this site.
