Aims and Scope

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of Letters to the Editors, Editorials, and correspondence, with a specific focus on nutrition-related public health. The scope of Public Health Nutrition encompasses nutrition and nutrigenomics at national and international levels, including work on assessment of nutritional status and nutritional environments, communication strategies, nutritional labeling, food systems, implementation of programs and interventions, and sustainability of dietary patterns, food systems, and supplies. We welcome papers that:

• Address assessment, monitoring, and surveillance of nutritional status or the quality of nutritional environments.
• Describe the development and evaluation of methodology for assessing nutritional status in population-based samples.
• Identify and analyse behavioural, social, cultural, environmental, political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes.

The Nutrition Society

The Society has as its objective the advancement of the scientific study of nutrition and its application to the maintenance of human and animal health.

Particulars of The Nutrition Society and application forms for membership are available from the Honorary Secretary, The Nutrition Society, 18 College Street, 210 Shadwell Basin Road, London E1W 7NU, UK.
