Using population surveys and models to reassess the conservation status of an endemic Amazonian titi monkey in a deforestation hotspot—CORRIGENDUM

FELIPE ENNES SILVA, LUCIANA GOSI PACCA, LISLEY PEREIRA LEMOS Almério Câmara Gusmão, Odair Diogo da Silva, Júlio César Dalponte Caetano L.B. Franco, Marcelo Ismar Santana, Gerson Buss and Hani R. El Bizri

DOI: doi.org/10.1017/S0030605322000655. Published online by Cambridge University Press, 29 September 2022.

In the original publication of this article, there was a mistake in the abstract. The following sentence was incorrect: 'Habitat loss was estimated to be $58,365 \text{ km}^2$ (32.3% of its current range) over the next 24 years (three *P. bernhardi* generations) under a conservative governance model of deforestation and $105,289 \text{ km}^2$ (58.3%) under a businessas-usual model.'

The correct sentence is: 'Habitat loss was estimated to be $58,365 \text{ km}^2$ (44.5% of its current range) over the next 24 years (three *P. bernhardi* generations) under a conservative

governance model of deforestation and 105,289 km² (80.2%) under a business-as-usual model.'

The article has been updated with the correct sentence.
