Cultural Evolution
People's Motivations are Changing, and Reshaping the World

Ronald F. Inglehart, University of Michigan, Ann Arbor

'Cultural Evolution culminates a remarkably productive half-century's exploration of cultural change by Ronald F. Inglehart. This renowned scholar now extends the reach of his theory to global history, while honing his concepts to dissect, for example, the emergence of right-wing populism and LGBTQ activism. This is Inglehart at his most ambitious and most astute. It is a powerful book.'

Behavioural Public Policy (BPP) is an interdisciplinary and international peer-reviewed journal devoted to behavioural research and its relevance to public policy.

The study of human behaviour is important within many disciplinary specialties and in recent years the findings from this field have begun to be applied to policy concerns in a substantive and sustained way. BPP seeks to be multidisciplinary and therefore welcomes articles from economists, psychologists, philosophers, anthropologists, sociologists, political scientists, primatologists, evolutionary biologists, legal scholars and others, so long as their work relates the study of human behaviour directly to a policy concern.

BPP focuses on high-quality research which has international relevance and which is framed such that the arguments are accessible to a multidisciplinary audience of academics and policy makers.
