Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

CONTENTS

Sarkar, P. and Verma, J. K.
Local cohomology of multi-Rees algebras, joint reduction numbers and product of complete ideals ................. 1

Jorgenson, J. and Smajlović, L.
On the distribution of zeros of the derivative of Selberg’s zeta function associated to finite volume Riemann surfaces ........ 21

Ariki, S., Kase, R. and Miyamoto, K.
On components of stable Auslander–Reiten quivers that contain Heller lattices: the case of truncated polynomial rings .......... 72

Morifuji, T.
A vanishing theorem for the \( \eta \)-invariant and Hurwitz groups .......... 114

Kumar, A. and Kuwata, M.
Elliptic K3 surfaces associated with the product of two elliptic curves: Mordell–Weil lattices and their fields of definition .... 124

Zemel, S.
Weight changing operators for automorphic forms on Grassmannians and differential properties of certain theta lifts 186
