GUY'S SILENT SUCTION APPARATUS

as made for

WM. MAYHEW MOLLISON, C.B.E., F.R.C.S.

“An efficient *silent* suction apparatus is essential in many throat investigations and operations and indeed is used for many operations on other parts of the body.

“The above illustration shows an Electric Suction Apparatus which can rightly claim to be more efficient than the apparatus generally in use. The suction is continuous and so powerful that clots of blood and the most tenacious mucus are quickly removed. The apparatus is quiet and can easily be moved about the operation theatre and from one theatre to another. It is possible to use it for intra-tracheal

insufflation at the same time as suction since the pump delivers sixty litres of air per minute. The valves in the cylinder head are strong and specially designed for silence in operation and the sump of the machine carries enough oil for six months' continuous use; this ensures efficiency with the minimum of attention. The entire unit is mounted in a robust mahogany case which is fitted with four rubber-tyred castors. On the side of the case two large screw necked bottles are mounted. These bottles are the commercial “Kilner” type and can therefore be replaced with the minimum of expense. Blood and other fluids are removed from the operating field by the suction plant and find their way into the big bottle. The second bottle is a safety trap in the unlikely event of the first bottle becoming full at a moment when it is inconvenient to change it.

“There are no resistances to regulate the speed and in order to use the apparatus it is only necessary to connect it to the main electrical supply.” The makers are Down Bros., Ltd., London.

PRESCRIBE DeVilbiss

No. 15 ATOMIZER

For more than 45 years the medical profession has recognized the value of the DeVilbiss No. 15 Atomizer for applying sprayed solutions in prescribed self-treatment. The adjustable gold tip permits spraying in any direction, the vented nasal guard prevents excess pressure in the nasal cavities and the atomizer may be sterilized easily and rapidly by boiling or passing the tip through a flame. Dependable and certain in the hands of the patient, the DeVilbiss No. 15 applies the treatment you want gently and thoroughly—may we suggest that you mark “DeVilbiss Atomizer No. 15” on your prescription where its use is indicated.

AEROGRAPH Co. Ltd., 43 Holborn Viaduct, London, E.C.1. Sole distributors of DEVILBISS products in the United Kingdom. Telephone : Holborn 1257 and 1258

Ventilating Grooves prevent excess pressure in Nasal Cavities.

Adjustable gold tip for spraying in any direction

At this season of the year

when Bronchitis, Pneumonia, Influenza and other acute infectious fevers are rife, the use of Antiphlogistine Brand Dressing is a helpful ally in combatting these conditions.

Promoting the action of the skin and lessening the tension in the chest, Antiphlogistine Dressing serves to relieve the pain, loosen the cough and shorten the duration of the acute symptoms.

Its timely application may help to prevent or to overcome pulmonary congestion and lessen the danger of complicating secondary lobar pneumonia and bronco-pneumonia.
