Special Issue: Materials Research in an Aberration-Free Environment

Introduction

David J. Smith

Review Article

Development of Aberration-Corrected Electron Microscopy

David J. Smith

Feature Articles

Contrast Transfer and Resolution Limits for Sub-Angstrom High-Resolution Transmission Electron Microscopy

Markus Lentzen

A Practical Solution for Eliminating Artificial Image Contrast in Aberration-Corrected TEM

Jun Yamasaki, Tomoyuki Kawai, Yushi Kondo, and Nobuo Tanaka

Spatial Resolution and Information Transfer in Scanning Transmission Electron Microscopy

Yiping Peng, Mark P. Oxley, Andrew R. Lupini, Matthew F. Chisholm, and Stephen J. Pennycook

Modeling Atomic-Resolution Scanning Transmission Electron Microscopy Images

Scott D. Findlay, Mark P. Oxley, and Leslie J. Allen

High-Resolution TEM and the Application of Direct and Indirect Aberration Correction

Crispin J.D. Hetherington, Lan-Yun Shery Chang, Sarah Haigh, Peter D. Nellist, Lionel Cervera Gontard, Rafal E. Dunin-Borkowski, and Angus I. Kirkland

Electron Holography with a C_s -Corrected Transmission Electron Microscope

Dorin Geiger, Hannes Lichte, Martin Linck and Michael Lehmann

Imaging Modes for Scanning Confocal Electron Microscopy in a Double Aberration-Corrected Transmission Electron Microscope

P.D. Nellist, E.C. Cosgriff, G. Behan, and A.I. Kirkland

Motion of Gold Atoms on Carbon in the Aberration-Corrected STEM

Philip E. Batson

Aberration-Corrected STEM Imaging of Ag on γ - Al_2O_3

Douglas A. Blom, Lawrence F. Allard, Chaitanya K. Narula, and Melanie J. Moses-DeBusk

Atomic-Resolution STEM in the Aberration-Corrected JEOL JEM2200FS

Robert F. Klie, Craig Johnson, and Yimei Zhu

HUMOR

Dear Abbe

Dear Abbe,

Did you know de Broglie, and was that his real hair?

Coif Connoisseur from Cornell

Dear Conni,

Louis de Broglie was one of the funniest guys I ever met. I'll never forget the time he wanted to show me how electrons could be both a wave and a particle at the same time. He had rigged up this giant capacitor and when he turned it on a spark the size of an umbrella shot across the room and singed all the fur off his cat that had been sleeping peacefully on his settee. We laughed and laughed until I thought I was going to pass out! Louie was also terrific at "quarters" and could, on demand, make milk

shoot out of both nostrils. If you look closely at the photo from the 1927 Solvay conference you will see Pauli looking around confused. de Broglie told me years later it was because he had "cut the cheese" just before the picture was taken. Gott in himmel the guy was a riot. What was your question again?

Life is full of questions! If there is an answer,

A. PICCARD E. HENRIOT P. EHRENFEST G. HERZEN T. DE DONDER E. SCHROEDINGER E. VERSCHAFELT W. PAULI W. HEISENBERG R.H. FOWLER L. BRILLOUIN
P. DEBYE M. KNUDSEN W.L. BRAGG H.A. KRAMERS P.A.M. DIRAC A.H. COMPTON L. DE BROGLIE M. BORN N. BOHR
I. LANGMUIR M. PLANCK F.A. LORENTZ A. EINSTEIN F. LANGEVIN G.E. GUYE C.F. WILSON O.W. RICHARDSON
Absent: S. W.H. BRAGG, H. DEBLANDIERE et E. VAN AUDEL
Marie CURIE

Herr Abbe will flush it out. If not, he'll make it up. Please send all your worries and queries to his mentally acute assistant at js Shields@cb.uga.edu.
