The Journal of Navigation

THE *Journal* is published quarterly by the Institute and is edited by M. W. RICHEY. It contains original papers contributing to the science of navigation, including those presented at meetings of the Institute together with the ensuing discussion. In addition the *Journal* includes a record of current navigational work, reviews of important books, and other matters of concern to those interested in navigation. The views expressed in the *Journal* are not necessarily those of the Institute, or of any organization or department to which the authors may belong. Crown Copyright may be reserved.

The *Journal* is issued free to all members of the Institute. It is sold to the public at two pounds per copy or, by subscription, at eight pounds thirty-five per annum (post free) and may be obtained through all booksellers and John Murray (Publishers) Ltd., 50 Albemarle Street, London W1. Back numbers dated two years prior to the current volume may be obtained from William Dawson & Sons, Ltd., (Back Issues Department), Cannon House, Folkestone, Kent.

Enquiries for advertising space should be addressed to the Institute offices.

The postal address of the Institute is The Royal Institute of Navigation, at The Royal Geographical Society, 1 Kensington Gore, London SW7. (Telephone: 01-589 5021).

Volumes of the *Journal* can be bound for two pounds. The parts should be sent to William Clowes & Sons Ltd., 15 Cavendish Square, London, W1M 0HT.

We all admire built in navigation aids

But can they pinpoint their position to within 10 yards in 1,000,000 square miles of ocean?

That's the kind of positioning accuracy you get from the latest marine radar simulator from Solartron-Schlumberger. You've a right to expect the best aids from the training specialists in this field. That's exactly what the Type 2080 Series offers you - the best fully digital system providing facilities to meet all your training requirements, supplied in either manual or programmable form.

- Pinpoint positioning accuracy of $\pm 0.005n.m.$ in an area 1000n.m. square.
- Two or more independent exercises can be carried out in separate parts of the total playing area without mutual interference.
- The lightly loaded general purpose computer allows simulation of hyperbolic navigation systems and other aids.
- A capability of virtually unlimited expansion between one Own Ship and up to 256 targets, and four Own Ships and up to 60 targets, without computer loading problems or loss of radar data.

■ And manoeuvring data for both Own Ships and targets can be preprogrammed to demonstrate typical collision conditions.

Our marine radar simulators are vital aids to training in colleges and establishments around all the world's oceans. When you need total training capability, look to the training specialists.

Institute Publications

The Use of Radar at Sea

Fourth revised edition now reprinted. 'An excellent book which fulfils admirably the function for which it was conceived. It should find a place in the chart-room bookcase of every radar-fitted vessel and in the private reference library of every navigator'. (*Journal of the Honourable Company of Master Mariners.*) (Hollis & Carter, £3.75)

The Haven Finding Art

by E. G. R. Taylor.

'A better book on the art of navigation down to Captain Cook's days has not been written in the English language.' (*Mariner's Mirror.*)

This new edition contains an appendix by Joseph Needham, F.R.S., on the history of navigation in China. (Hollis & Carter, £2.50
Members £2.00 plus postage)

The Geometrical Seaman

An illustrated work on early navigational instruments, by E. G. R. Taylor & M. W. Richey. (Hollis & Carter, £1.50)

The Mathematical Practitioners of Tudor and Stuart England

by E. G. R. Taylor.

An account of the ideas, instruments and methods in navigation and surveying between 1485 and 1715 with lists of the mathematical practitioners with biographical notes and details of their work.

(Cambridge University Press, £5.90
Members £4.43 plus postage)

The Mathematical Practitioners of Hanoverian England

by E. G. R. Taylor.

This book, a sequel to the earlier volume, takes the story up to 1840, by which time the independent mathematical practitioner had virtually disappeared, absorbed into the large firm or organization as a consequence of industrial and social change.

(Cambridge University Press, £6.90
Members £5.17 plus postage)

In the Wake of the Torrey Canyon: Reflections on a Disaster

by L. Oudet.

'... should be essential and compulsory reading for every navigator of every ship under every flag'. (*Nautical Magazine.*)

'Were I a fleet owner or manager, I'd see that every deck officer in my company had a copy of this excellent book.' (*Navigation.*)

(Hollis & Carter, £1.00
Members 75p)

LYKES SELECTS DIGILOT COLLISION AVOIDANCE

DIGILOT®

FULLY AUTOMATIC MARINE RADAR PLOTTER

- Chartlike presentation on bright 18" CRT display.
- Automatic acquisition and tracking.
- Automatic plotting continuously updated without manual assistance.
- Potential collision threats assessed at a glance at all times.
- Automatic CPA Alarm and trial maneuver facilities.
- World-wide installation and service.

and safety of ships at sea

INFALLIBILITY

PREDICTOR II - the most advanced marine radar in the world

Radar plotting is as easy as pressing a button. 'Predictor' radar tracks and plots every target on the screen continuously, automatically and with infallible accuracy. True or relative tracks are presented as 4 plots equally spaced in time, up-dated every 10 seconds.

And before you alter course or speed, 'Predictor' will work out the new triangle of velocities for every target and plot the *impending* situation—before you alter.

DEPENDABILITY

RADIOLOCATOR—radar designed throughout for simplicity and reliability

Conventional . . . yes, but the best of its kind. 'Radiolocator' gives you really dependable, workaday radar at the right price.

Solid-state circuitry. Only two thermionic devices—a long-life magnetron and choice of 12-inch or 16-inch CRT. All normal marine radar facilities, plus true bearing indication, are standard; and options include True Motion, compass stabilisation, reflection plotter, dual displays, and full or partial interswitching of dual installations.

Authoritative Sailing-Ship Books

GOOLIE SHIPS AND OIL SAILERS

This book is a record of two special phases of sea life in Sailing Ships
 190 Pages 9½" × 7½" 56 Illustrations £2.55 (per post £2.85)

THE COLONIAL CLIPPERS

The Great Wooden Ships of the Blackwall and other lines
 400 Pages 9½" × 7½" 81 Illustrations, 4 Plans £2.70 (per post £3.00)

THE CHINA CLIPPERS

A History of the celebrated Clipper Ships in the Chinese Opium and Tea Trades
 310 Pages 9½" × 7½" 34 Illustrations £2.80 (per post £3.10)

THE LAST OF THE WINDJAMMERS

Vol. I. The Sailing Ships of the Seventies-Eighties
 535 Pages 9½" × 7½" 126 Illustrations, 17 Plans £4.50 (per post £4.80)

Vol. II. The Deep-Water Sailing Ships, 1888-1928
 470 Pages 9½" × 7½" 174 Illustrations, 17 Plans £4.50 (per post £4.80)

By BASIL LUBBOCK

All Lubbock's work is the product of original and comprehensive research. These books are recommended without reserve to the student of the sailing-ship

MASTING AND RIGGING

The Clipper Ship and Ocean Carrier
 £4.20 (per post £4.50)

DEEP WATER SAIL

A book dealing with the Nineteenth and Twentieth Century Sailing Ships
 £4.00 (per post £4.30)

PLANK-ON-FRAME MODELS and Scale Mastng and Rigging

Vol. I. £4.20 (per post £4.50) Vol. II. £2.50 (per post £2.73)

By HAROLD A. UNDERHILL

A leading authority on Sail and Ship Modelling

Catalogue "N" giving further titles and details, free on request

INTERNATIONAL HYDROGRAPHIC BUREAU
Avenue Président J. F. Kennedy, Monte-Carlo, Monaco

publishes

**twice a year, in January and July,
an English and a French edition of**

THE INTERNATIONAL HYDROGRAPHIC REVIEW

**This publication contains articles of topical interest on hydrography,
oceanography and related ocean technology and sciences.**

Approx. 160 pages, 18×27 cm; numerous illustrations.

Annual subscription: 100 French Francs, plus postage.

Original articles for publication are welcome.

The Bureau also publishes monthly

THE INTERNATIONAL HYDROGRAPHIC BULLETIN

**which contains topical news and reports the work of the world
hydrographic community. Charts and publications issued by Hydro-
graphic Offices are listed each month.**

A bi-lingual publication—English and French

Approx. 40 pages, 18×27 cm

Yearly subscription: 60 French Francs

Individual issue: 6 French Francs

**A 30% reduction is granted to research institutions, government
offices, naval or merchant marine officers and to practising hydro-
graphic surveyors of the IHO's Member States who send their
orders direct to the Bureau.**

**The list of International Hydrographic Bureau publications, and the
conditions of sale, will be supplied free on request.**

'NAVIGATION (U.S.A.)'

Navigation, the quarterly Journal of the American Institute of Navigation, is available to Members of this Institute at a reduced subscription of £2 a year. Volume 21, No. 1 (Spring 1974), contains the following papers.

SAFE SEPARATION IN CONTROLLED FLIGHT

John M. Holt

THE FEASIBILITY OF APPLYING THE ACTIVE TVTIME SYSTEM TO AUTOMATIC VEHICLE LOCATION

D. A. Howe

THE EFFECTS OF SENSOR ERRORS IN CERTAIN MARINE COLLISION AVOIDANCE AND THREAT ASSESSMENT SYSTEMS

Robert F. Riggs

ARE THE LEGAL FRONTIERS OF NAVIGATION IN PERIL?

L. Jarett

A SECOND GENERATION NAVY SATELLITE MARINE NAVIGATION SYSTEM

A. R. Dennis

THE USE OF THE HP-35 CALCULATOR FOR SIGHT REDUCTION

S. Rigby

THE NAV-AID: A CALCULATOR FOR NAVIGATION

R. G. Hirsch and R. L. Charlton

AN AZIMUTH DETERMINATION SYSTEM UTILIZING THE NAVY NAVIGATION SATELLITES

J. R. Albertine

MIXED INERTIAL NAVIGATION SYSTEMS FOR SURFACE EFFECT SHIPS

C. SanGiovanni, Jr. and J. Moryl

ENHANCEMENT OF SHIP'S RADAR TRANSPONDER FOR COLLISION AVOIDANCE EFFECTIVENESS

C. A. Abramowski

PSYCHOLOGICAL EFFECTS IN CELESTIAL NAVIGATION

R. M. Leve

THE INSTITUTE'S PROFESSIONAL FILE

REVIEWS OF RECENT BOOKS

'NAVIGATION'

NAVIGATION (Paris), the quarterly Journal of the French Institute of Navigation, is available to Members of the Institute at the preferential subscription rate of £5.00 per annum. The July 1974 issue contains the following papers.

I. LES NOUVEAUTÉS TECHNIQUES—

1. Optimisation des routes aériennes en vue de minimiser le risque de collision.
L. F. PAU and B. NILSSON
2. Navigation et radio. *G. E. BECK*
3. Les horloges de précision à la base d'un système de navigation. *S. S. D. JONES*

II. LA CHRONIQUE DU NAVIGANT—

1. Les centrales de cap et de verticale MGC 10 et les systèmes de navigation par inertie MGC 30. *J. HARDOUIN*
2. Calcul du point astronomique à l'aide d'un système portatif "Sextant-calculateur"

III. LE CONTROLE DU TRAFIC—

1. RNAV, futur support de l'A.T.C.

IV. L'HISTOIRE ET LA NAVIGATION—

1. Une carte nautique Arabe du Moyen Age. *H. GROSSET-GRANGE*
2. La contribution chinoise à la réalisation du compas de marine. *J. NEEDHAM*

V. INFORMATIONS—

IV. CHRONIQUE DES LIVRES ET REVUES—

As real as the view from the wheelhouse on a clear day

Situation Display from Kelvin Hughes

Situation Display is a major technical advance over conventional radar. It has a big, bright, screen that can be clearly seen by a number of viewers even in daylight. It gives the navigator a 'real world' picture of everything around him – ship's head up and compass stabilised. And all moving targets show their tracks building-up so that he can see at a glance positions, courses and approximate speeds of all vessels within the selected radar range. Whatever the weather, the S.D. picture is as real as the view from the wheelhouse on a clear day.

Kelvin Hughes Equipment & Systems
New North Road, Hainault, Ilford, Essex IG6 2UR
Telephone: 01-500 1020 Telex: 896401

The tanker *Melo*, showing the standard deck markings for helicopters. An article on the use of helicopters offshore appears at page 450.
