The Weed Science Society of America publishes original research and scholarship in the form of peer-reviewed articles in three international journals. *Weed Science* is focused on understanding "why" phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. *Weed Technology* focuses on understanding "how" weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports. Topics for *Weed Technology* include all aspects of weed management in agricultural, horticultural, ornamental, forestry, aquatic, turf, rights-of-way, and other settings; weed resistance to herbicides; herbicide resistant crops; biological weed control agents; new weed management techniques; impacts of weed competition with crops; vegetation management with plant growth regulators; weed surveys; weed-related grower surveys; education; and extension. Symposium papers and reviews are accepted. Consult the editor for additional information.

**Officers of the Weed Science Society of America**

- **President-Elect**: Sarah Ward, Director of Publications
- **Vice President**: Tracy Candelaria, Managing Editor
- **President**: Janis McFarland
- **Past President**: Tracy Candelaria
- **Managing Editor**: Tracy Candelaria
- **Chair, Constitution and Operating Procedures**: Mark Bernardi
- **Secretary**: Sarah Ward
- **Director of Publications**: Tracy Candelaria
- **Treasurer**: Sarah Ward

**Weed Technology** (ISSN 0890-037X) is published by the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234. It is published bimonthly, one volume per year, six issues per year beginning in February. Membership includes online access to *Weed Technology, Weed Science, Invasive Plant Science and Management*, and the online WSSA Newsletter: Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the *Weed Technology* subscription page at [https://www.cambridge.org/core/journals/weed-technology/subscribe](https://www.cambridge.org/core/journals/weed-technology/subscribe). Email: subscriptions_newyork@cambridge.org in USA, journals@cambridge.org outside USA.

*Weed Technology* publishes six times a year in February, April, June, August, October, and December. Annual institutional electronic subscription rates: US $369.00, UK £257.00.

Please use Editorial Manager to access manuscript submissions (http://www.editorialmanager.com/wt). Authors are asked to pay $85 for the first page and $65 per page thereafter as a portion of the cost of publication, plus an additional processing charge of $55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in *Weed Technology* are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique propagative materials they might possess with other workers in that area who request such materials for the purpose of scientific research.

Cover

A test stand mounted dHSD mill during the processing of wheat chaff. This test stand has been used to evaluate the efficacy of the integrated Harrington Seed Destructor mill in destroying the seed of numerous weed species. For more information, refer Walsh et al., pp. 103–108.
WEED MANAGEMENT-MAJOR CROPS

iHSD Mill Efficacy on the Seeds of Australian Cropping System Weeds. Michael J. Walsh, John C. Broster, and Stephen B. Powles .................................................. 103

Soybean Sensitivity to Florypyrauxifen-benzyl during Reproductive Growth and the Impact on Subsequent Progeny. M. Ryan Miller and Jason K. Norsworthy ........................................ 135

Glyphosate plus 2,4-D Deposition, Absorption, and Efficacy on Glyphosate-Resistant Weed Species as Influenced by Broadcast Spray Nozzle. Travis R. Legleiter, Bryan G. Young, and William G. Johnson .............. 141

Insecticide Seed Treatments as Safeners to Drift Rates of Herbicides in Soybean and Grain Sorghum. Nicholas R. Steppig, Jason K. Norsworthy, Robert C. Scott, and Gus M. Lorenz ........................................ 150

Effect of Late-Season Herbicide Applications on Inflorescence and Seed Production of Glyphosate-Resistant Giant Ragweed (Ambrosia trifida). Zahoor A. Ganie, Simranpreet Kaur, Prashant Jha, Vipan Kumar, and Amit J. Jhala ........................................ 159

WEED MANAGEMENT-OTHER CROPS/AREAS

2,4-D-Resistant Buckhorn Plantain (Plantago lanceolata) in Managed Turf. Aaron J. Patton, Daniel V. Weisenberger, and Geoff P. Schortgen ........................................ 182

Tolerance of Chickpeas to Postemergence Broadleaf Herbicides. Rick A. Boydston, Howard Nelson, and Bernardo Chaves-Cordoba ........................................ 190

WEED MANAGEMENT-TECHNIQUES

Field Pea and Lentil Tolerance to Intercrop Cultivation. Katherine A. Stanley, Steven J. Shirliffe, Dilshan Benaragama, Lena D. Syrovy, and Hema S. N. Duddu ........................................ 205

WEED BIOLOGY AND COMPETITION

EDUCATION/EXTENSION

Count Nouns and Mass Nouns: Crops, Produce, and the Plural of Seed. Charles L. Mohler and Linda A. Heyne .................. 221

CORRIGENDA

Seasonal Application Timings Affect Dallisgrass (Paspalum dilatatum) Control in Tall Fescue – CORRIGENDUM. Matthew T. Elmore, James T. Brosnan, Thomas C. Mueller, Brandon J. Horvath, Dean A. Kopsell, and Gregory K. Breeden ........................................ 224
