Effects of prenatal substance exposure on infant temperament vary by context

Maternal emotion dysregulation is related to heightened mother–infant synchrony of facial affect

Income, cumulative risk, and longitudinal profiles of hypothalamic–pituitary–adrenal axis activity in preschool-age children

Identifying the temperamental roots of children’s patterns of security in the interparental relationship

Emotion understanding, parent mental state language, and behavior problems in internationally adopted children

Eye tracking indices of attentional bias in children of depressed mothers: Polygenic influences help to clarify previous mixed findings

(Contents continued on inside back cover)
Child personality facets and overreaching parental care as predictors of aggression and rule-breaking trajectories from childhood to adolescence

Parental and youth dopamine D4 receptor genotypes moderate multilevel contextual effects on rural African American youth's risk behavior

Longitudinal investigation of anxiety sensitivity growth trajectories and relations with anxiety and depression symptoms in adolescent girls

Mental health trajectories from adolescence to adulthood: Language disorder and other childhood and adolescent risk factors

The moderating role of parenting on the relationship between psychopathy and antisocial behavior in adolescence

Familial influences on the full range of variability in attention and activity levels during adolescence: A longitudinal twin study

Trajectories of childhood internalizing and externalizing psychopathology and psychotic-like experiences in adolescence: A prospective population-based cohort study
