

SHEA/ESGNI

Training Course in Hospital Epidemiology

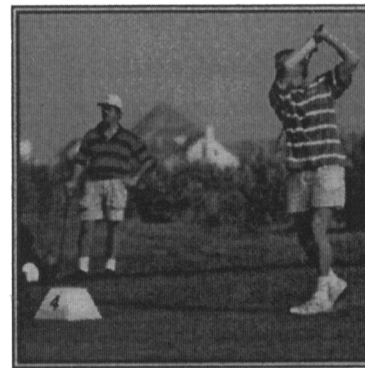

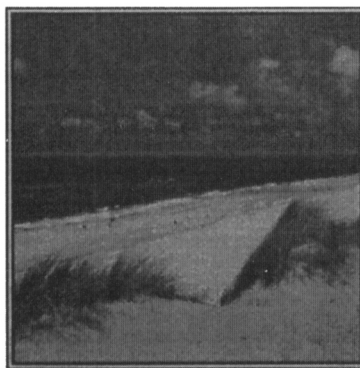

October 29-November 2, 1999

**Beach & Golf Resort Ooghduyne
Julianadorp aan Zee
The Netherlands**

This intensive training program is designed for those who have responsibility for hospital epidemiology and infection control programs. It is sponsored by the Society for Healthcare Epidemiology of America and the European Study Group of Nosocomial Infections (ESGNI) of the European Society for Clinical Microbiology and Infectious Diseases (ESCMID). The course is taught by renowned experts from the United States and Europe who are dedicated to continuous quality improvement in infection control and the application of epidemiology within the hospital setting. Topics to be addressed include, but are not limited to, patterns of transmission of nosoco-

mial infections; risk factors for nosocomial infections; approach to epidemic investigation; molecular typing; disinfection and sterilization; epidemic in the OR; introduction to surveillance; use of computerized data in outbreak investigations: MRSA; isolation systems and TB; investigation of excess mortality in the NICU; employee safety and control of bloodborne pathogens; control of antibiotic resistance and antibiotic policies.

AT LAST

*A hydrogen peroxide
solution for flexible
endoscope reprocessing*

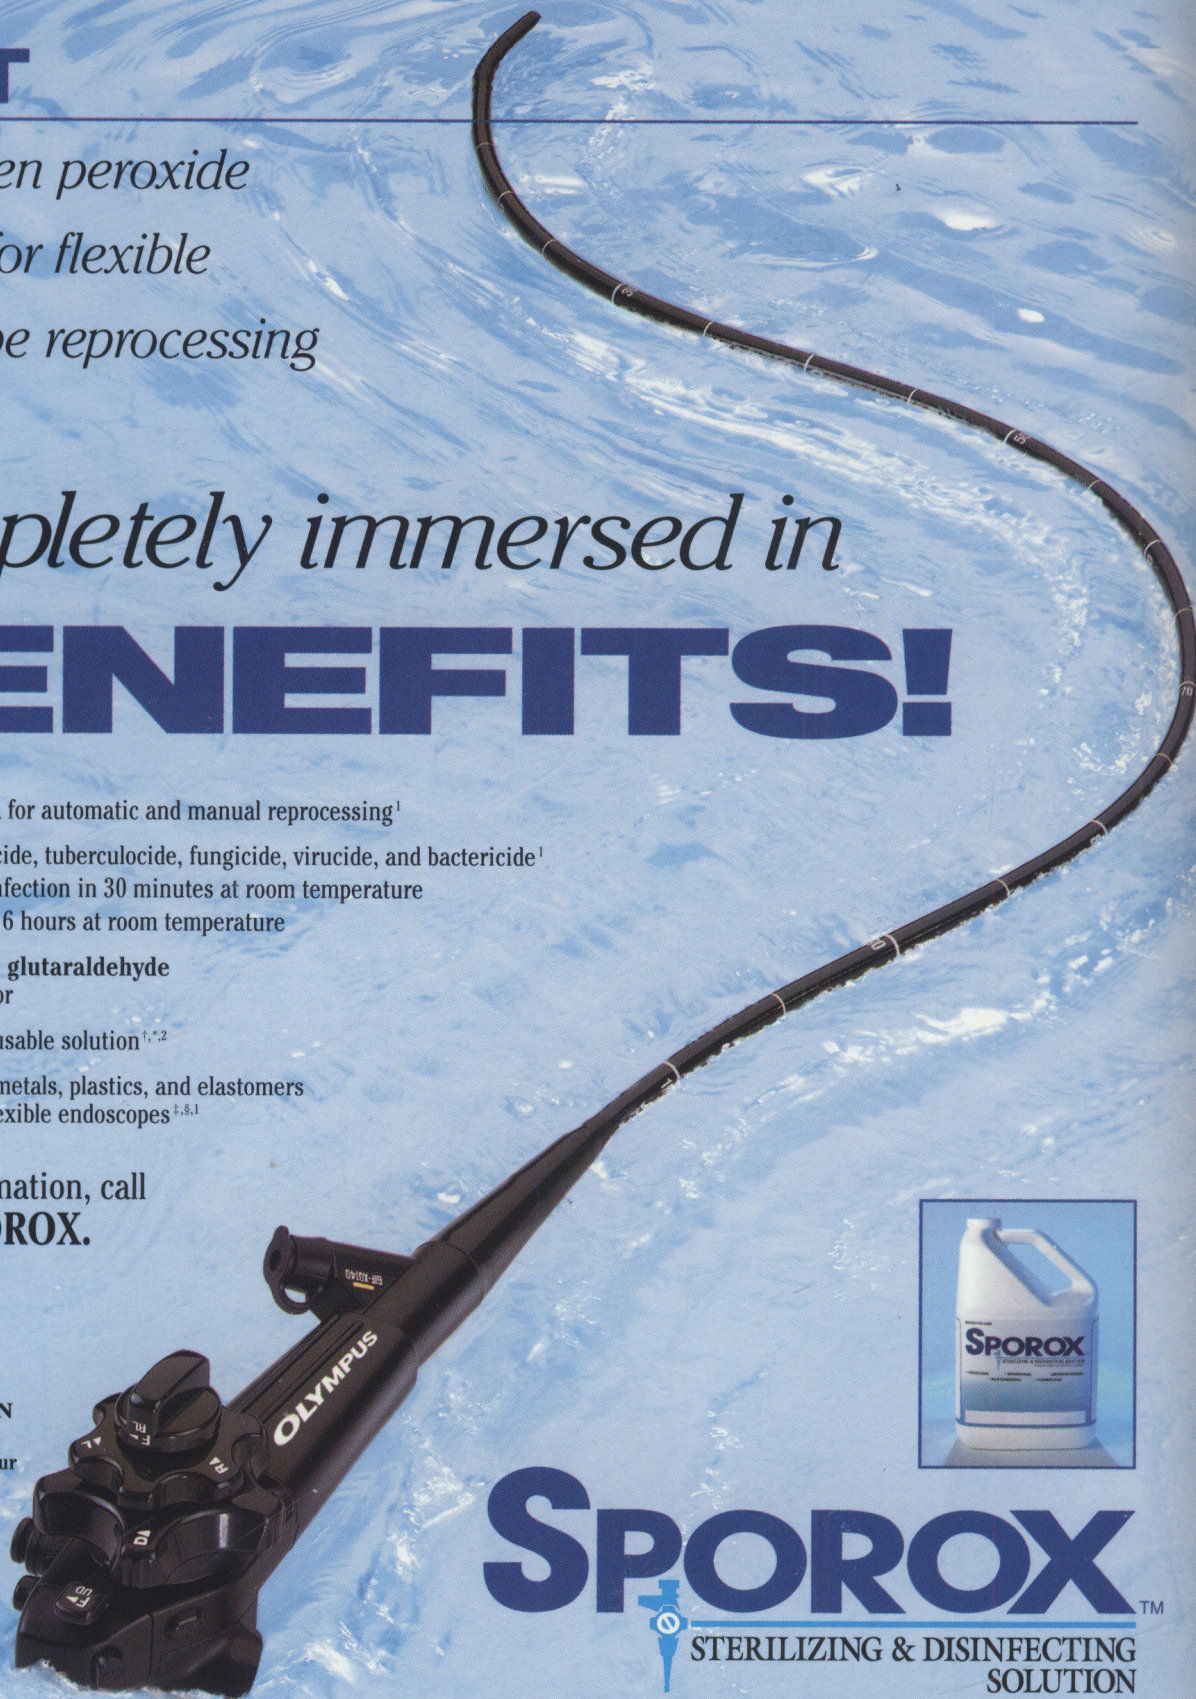

Completely immersed in **BENEFITS!**

- Premixed formula for automatic and manual reprocessing¹
- Fast-acting sporicide, tuberculocide, fungicide, virucide, and bactericide¹
 - High-level disinfection in 30 minutes at room temperature
 - Sterilization in 6 hours at room temperature
- Does not contain glutaraldehyde
 - no aldehyde odor
- Cost-effective reusable solution^{1,*,2}
- Compatible with metals, plastics, and elastomers such as those in flexible endoscopes^{2,§,1}
