Aims and Scope
Established in 1931, the internationally recognised Bulletin of Entomological Research aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The Bulletin publishes high quality and original research papers, critiques and review articles concerning insects or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The Bulletin does not publish the results of pesticide testing or traditional taxonomic revisions.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

Publisher
Cambridge University Press

Editor-in-Chief
Dr Paul De Barro
CSIRO Health & Biosecurity, Brisbane, Queensland 4001, Australia

NOTES FOR AUTHORS
Please see the complete version (“Instructions for Contributors”) at journals.cambridge.org/ber

Stylus of Paper
Bulletin of Entomological Research publishes two types of paper:

Full research papers

Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication.
We also welcome “Letters to the Editor” on comments or previously published papers.

Manuscript Preparation

Language

Manuscripts should be in English.

Abstract

Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

• The text, divided under appropriate headings. Clearly differentiate between primary (bold, large font size), secondary (bold, text font size) and tertiary (italics) headings

• Acknowledgements (if any)

• References (for further information about presenting references, please see below)

• Tables, either at the end of the manuscript or as separate files.

Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.

Illustrations should be submitted as separate files in TIFF or EPS format but captions should be listed at the end of the manuscript text.

Abstract

Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References

References must be based on the name and year system, give full journal titles and conform to the following style:

Journal papers:

Full books:

Chapter:

Proceedings:

Please list papers by more than two authors, but with the same first author, by year sequence and alphabetically within each year. Citation of authors in the text should appear in the form: Thiery (2014) or (Thiery, 2014). Authors should be cited in chronological order as: (Jer vis, 2005; Krantz & Walter, 2009).

Tables

Tables should be in a simple form and should not be used if text or illustrations give the same information. Due to costs it may not be possible to reproduce more than one figure or table per page. All tables must be clearly titled.

Illustrations

Illustrations should be submitted in TIF or EPS format at a size of at least 750 dpi resolution, at the following minimum resolutions: Line artwork (black & white), 1200dpi. Combination, e.g. line/texture (grey-scale), 800dpi. Black & White halftone (grey-scale), 300dpi. Colour halftone, 300dpi. Comprehensive guidelines on creating suitable electronic artwork can be found at http://dx.sheridan.com/documentcreation/guide/guidelineart.htm where you will find extensive guidelines on preparing electronic figures. An online preflighting tool (http://dx.sheridan.com/documentcreation/guide/guidelineart.htm) is also available where you can check if your figures are suitable for reproduciton. Captions should be listed at the end of the manuscript text.

Supplementary Material

Additional information which due to its nature does not lend itself to print media (example: full data sets, movie or sounds files etc.) may be submitted for online-only publication. Please see full details (“Instructions for Contributors”) at journals.cambridge.org/ber.

Technical and Nomenclature Standards

All work should use SI units as standard. Taxonomic names can be a mixture of the English vernacular and Latin, depending on current usage.

Manuscript Preparation

We kindly ask that you follow the instructions below when preparing your manuscript for submission. This will minimize the risk of errors being introduced during the publishing process.

• Use double-line spacing and ample margins (at least 2.5cm) on each side.

• Do not underline anything

• Number each line consecutively across the pages of the manuscript, rather than within pages

• Number every page (preferably the top right corner)

• Do not indent the start of each paragraph

• Use italics for taxonomic nomenclature and bold for headings

• Use standard abbreviations (e.g. Fig. and Figs)

• Use British rather than American Spellings and ‘s’ rather than ‘s’s spellings in words with ‘s’

Voucher specimens

The deposition of voucher specimens should be considered when appropriate.

Manuscript Submission

All manuscripts should be submitted via our on-line system, Editorial Manager, at http://www.editorialmanager.com/ber. New users will need to register first.

Peer review

Communications for peer review will be by email as far as possible. Authors are invited to suggest the names and contact details of at least two potential referees and are asked to provide keywords indicating the content of their manuscript. Please also give a brief description (no more than 50 words) of why the manuscript is an important contribution to entomology research.

Publication

Authors will be supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the Bulletin and has not been processed previously published elsewhere.

Proofs

Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

Offprints

The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and may be obtained through the Publisher.

For more information on the policies and procedures of the Bulletin of Entomological Research, please consult the full guidelines available at http://journals.cambridge.org/ber.
