Figures

1.1 Yearly number of articles in selected UK national newspapers related to climate change  
1.2 Basic elements of socio-technical systems  
1.3 Three ontological dimensions of socio-technical systems  
1.4 Multi-Level Perspective on socio-technical transitions  
1.5 Indexed CO\textsubscript{2} developments of major developed economies, 1990–2019  
1.6 UK domestic GHG emissions, 1990–2019  
2.1 Diffusion as a process of niche-accumulation  
2.2 Configurational dimensions of incumbent actor groups  
4.1 Schematic representation of the material elements and flows in the electricity system  
4.2 Greenhouse gas emissions from power stations in MtCO\textsubscript{2}, 1990–2019  
4.3 Relative contribution of UK electricity industry to Gross Value Added and number of jobs, 1980–2019  
4.4 Electricity supplied by fuel type in TWh, 1980–2019  
4.5 UK electricity price index in real terms for industrial and domestic sectors, 1970–2019  
4.6 Average prices of fuel inputs purchased by the major UK power producers, 1993–2019  
4.7 UK coal production, imports, and employment, 1970–2019  
4.8 UK natural gas production, net imports, and net exports, 1970–2019  
4.9 UK natural gas consumption by main user categories, 1970–2019  
4.10 UK market share evolution of energy companies, 2004–2019  
4.11 Final electricity consumption by different sectors, 1970–2019  
4.12 Total number of electrical appliances owned by UK households, 2006–2019  
4.13 UK domestic electricity consumption by appliance category, 1970–2015  
4.14 Number of light bulbs owned by UK households, 1970–2015  
4.15 Average energy consumption of new cold appliances, 1990–2015  
4.16 Number of wet appliances owned by UK households, 1970–2015  
4.17 Number of home computing devices owned by UK households, 1970–2015  
4.18 Electricity generated from renewable sources, 1990–2019
List of Figures

4.19 Global average levelised costs of electricity for different technologies, 2010–2020

4.20 Cumulative and annual installed capacity of UK onshore wind turbines

4.21 Cumulative and annual installed capacity of UK offshore wind turbines

4.22 Electricity generated from bio-power sub-categories, 1990–2019

4.23 Global weighted-average total installed costs of different RETs, 2010–2020

4.24 Cumulative UK installed capacity of solar-PV by capacity size, 2010–2020

4.25 Number of different kinds of bulbs for non-directional lighting owned by UK households, 2006–2019

4.26 Decreasing prices of light emitting diodes

4.27 Domestic smart meters operated by large suppliers, 2012–2020

4.28 Domestic smart meters quarterly installation by large suppliers

4.29 Annual number of new R&D and demonstration projects with smart grid technologies in the UK

4.30 Number and type of UK battery storage projects larger than 150 kW, 2013–2019

4.31 Annual installed capacity (in MW) of UK battery storage projects larger than 150 kW, 2013–2019

5.1 Schematic representation of different land-based passenger mobility systems

5.2 Schematic representation of the material elements and flows in the automobility system

5.3 Domestic passenger mobility (in billion passenger-kilometres) by transport mode, 1952–2019 in Great Britain

5.4 Daily use of transport modes (cars, railways, bus) in Great Britain between March 2020 and July 2021 (excluding the Christmas 2020 break); figures are percentages of an equivalent day or week

5.5 UK domestic transport-related greenhouse gas emissions, 1990–2019

5.6 Length of different road types (in kilometres) in Great Britain, 1923–2019

5.7 Motor vehicle traffic (road miles) by road class in Great Britain, 1993–2019

5.8 Annual car sales (new registrations) of private and light goods vehicles in Great Britain, 1954–2020

5.9 Crude oil price from 1978 to 2020

5.10 Annual car sales (new registrations) of petrol, diesel, and ‘other’ cars in Great Britain, 2001–2020

5.11 Relative cost developments 1997–2019 (1997=100) various motoring costs, bus and rail fares, and cost of living

5.12 Passenger car fleet (total number of licensed vehicles) in Great Britain by fuel type, 1994–2020

5.13 Sales-weighted average new car fuel consumption in Great Britain, 1997–2019

5.14 Passenger cars produced in the UK in millions, 2003–2020

5.15 Average distance travelled by car/van for different purposes (miles per person per year, England), 2002–2019

5.16 Household car availability in England, 1985–2019

5.17 Average per capita passenger travel by cars and light vans in Great Britain, 1971–2019
List of Figures

5.18 Indexed transport modes in London, 2002–2018 150
5.19 Length of railway infrastructure and electrified routes (in kilometres) in Great Britain, 1946–2019 158
5.20 Passenger kilometres by rail in Great Britain, 1952–2019 158
5.21 Average distance travelled by railways for different purposes (miles per person per year, England), 2002–2019 159
5.22 Government support to the rail industry, 1985–2019 in £million 160
5.23 Number of English passenger journeys (in millions) on local buses, 1982–2019 165
5.24 Operating revenue (in £millions at current prices) for local bus services in England, 2004–2019 167
5.25 Passenger kilometres by pedal bicycles, Great Britain, 1952–2019, in billion kilometres 171
5.26 Daily use of bicycles in Great Britain between March 2020 and July 2021 172
5.27 Trend in cycle flows (in thousand cycles per day) across central cordon, 1977–2018 173
5.28 Annual electric car sales (new vehicle registrations) in Great Britain in thousands, 2001–2020 177
5.29 Battery pack price 178
5.30 Number of public electric vehicle charging devices in the UK 179
5.31 Biofuel use in UK transport, 2004–2019 (excluding aviation), in million tons oil equivalent 184
5.32 Real and adjusted percentage of biofuels in road transport fuel use, 2005–2019 184
5.33 Percentage of working population working ‘at home’ and ‘from home’, 1992–2020 187
5.34 Major occupational groups (from ONS categorisation) in the ‘working at home’ category, 2012–2020 188
5.35 Number of members and number of cars in London car sharing clubs, 2010–2018 191
5.36 Number of licensed London taxis and private hire vehicles (PHVs) and drivers 192
6.1 Schematic representation of the material elements and flows in the dominant UK (domestic) heat system (involving heating and buildings) 221
6.2 UK greenhouse gas emissions (in MtCO₂e) from buildings, 1990–2019 222
6.3 Gas production, imports, and demand in the UK, 1998–2020 223
6.4 Evolution of average gas price (in GPB/GJ) for households in the UK, 1991–2019 224
6.5 Boiler types in the UK, 1975–2017 225
6.6 Domestic energy consumption for space heating and water heating in kilotons of oil equivalent, 1970–2019 225
6.7 Average internal temperature in UK homes, 1970–2012 226
6.8 Domestic market gas supply market shares in GB, 2005–2020 227
6.9 Age profile of UK housing stock 236
6.10 Average heat loss per dwelling 237
6.11 Diffusion of different home insulation measures in UK homes, 1976–2018 238
List of Figures

6.12 Total number of UK dwellings (in millions) per tenure category, 1980–2018  239
6.13 Insulation measures in English houses by tenure, 2010 and 2019  240
6.14 Delivery rates of key insulation measures in UK houses, in millions of installations  240
6.15 Number of permanent dwellings completed, by sector, United Kingdom, 1949–2019  241
6.16 Renewable sources to generate heat (all sectors), 1990–2019  251
6.17 Quarterly and cumulative accreditations of low-carbon heating installations under domestic RHI (number of installations)  254
6.18 Variations in domestic RHI subsidy levels between 2015 and 2020 (p/kWh),  255
6.19 Diffusion of solar thermal in the UK, annual installed capacity, in m²  261
6.20 Green gas price premium versus blend percentage  265
6.21 Cumulative number of passive house units in the UK  271
7.1 Schematic MLP-representation of electricity system reconfiguration with bold, normal, and dotted lines representing the relative contributions of different innovations to unfolding carbon reductions  295
7.2 Schematic MLP-representation of passenger mobility systems reconfiguration with bold, normal, and dotted lines the relative contributions of different innovations to unfolding carbon reductions  296
7.3 Schematic MLP-representation of heat system reconfiguration with bold, normal, and dotted lines the relative contributions of different innovations to unfolding carbon reductions  297
7.4 Final energy consumption (in million tonnes of oil equivalent) by user category  332
