# TABLE OF CONTENTS

The cylindric algebras of three-valued logic. by Norman Feldman .......... 1201
Relative constructivity. by Ulrich Kohlenbach .............................. 1218
Filtral powers of structures. by P. Owwehan and H. Rose .......... 1239
Equivalence elementaire et decidabilitie pour des structures du type groupe agissant sur un groupe abelien. by Patrick Simonetta .............. 1255
Termination and confluenm in infinitary term rewriting. by P. H. Rodenburg 1286
Invisible genericity and 0#. by M. C. Stanley .............................. 1297
Bounding minimal degrees by computably enumerable degrees. by Angsheng Li and Dongping Yang .................................. 1319
How is it that infinitary methods can be applied to finitary mathematics? Godel's T$: a case study. by Andreas Weiermann .......... 1348
Compactness of Loeb spaces. by Renling Jin and Saharon Shelah ....... 1371
The complexity of the core model. by William J. Mitchell .......... 1393
Foundation versus induction in Kripke-Platek set theory. by Domenico Zambella ........................................ 1399
The least measurable can be strongly compact and indestructible. by Arthur W. Apter and Moti Gitik .................................. 1404
The shuffle Hopf algebra and noncommutative full completeness. by R. F. Blute and P. J. Scott .......................... 1413
Preserving $\sigma$-ideals. by Jindrich Zapletal ................................ 1437
Quantifier elimination for neoabpact sets. by H. Jerome Keisler .... 1442
CM-triviality and stable groups. by Frank O. Wagner .......... 1473
Large cardinals and large dilators. by Andy Lewis ........ 1496
Weakly o-minimal structures and some of their properties. by B. Sh. Kulpehov ........................................ 1511
The interpretation of unsolvable $\lambda$-terms in models of untyped $\lambda$-calculus. by Rainer Kerth .......... 1529
Rectangular games. by Yde Venema ........................................ 1549
The determinacy of Blackwell games. by Donald A. Martin ......... 1565
Discreetly ordered modules as a first-order extension of the cutting planes proof system. by Jan Krajiwek ................ 1582
Correction to “T-convexity and tame extensions II”. by Lou van den Dries 1597
Reviews ............................................................... 1598

The Journal of Symbolic Logic (ISSN 0022-4812) is published quarterly, in the months of March, June, September, and December, by the Association for Symbolic Logic, Inc., at 1325 South Oak Street, Champaign, IL 61820-6903, U.S.A. Second class postage is paid at Champaign, IL and additional offices. The Journal is distributed with the Bulletin of Symbolic Logic; the 1998 annual subscription price for the two journals is $310. Postmaster: Send address changes to The Journal of Symbolic Logic, Journals Division UIP, 1325 South Oak Street, Champaign, IL 61820-6903, U.S.A. Business correspondence should be sent to the Secretary-Treasurer of the Association. C. Ward Henson (address on inside back cover).
