Go Mobile

CJO Mobile (CJOm) is a streamlined Cambridge Journals Online (CJO) for smartphones and other small mobile devices

- Use CJOm to access all journal content including FirstView articles which are published online ahead of print
- Access quickly and easily thanks to simplified design and low resolution images
- Register for content alerts or save searches and articles – they will be available on both CJO and CJOm
- Your device will be detected and automatically directed to CJOm via: journals.cambridge.org

## REVIEW

Balloon atrial septostomy and pre-operative brain injury in neonates with transposition of the great arteries: a systematic review and a meta-analysis

*Angelo Polito, Zaccaria Ricci, Tiziana Fragasso, Paola E. Cogo*

## ORIGINAL ARTICLES

- Role of toxicological determinations of amphetamines and cannabinoids in hair of adolescent patients in cardiologic diagnostic management

*Małgorzata Klys, Lea-Arne Szyszowski, Sebastian Rojek*

- Linguistic validation of a disease-specific quality of life measure for children and teenagers with cardiac disease

*Jo Wray, Rodney Franklin, Kate Brown, Jacqueline Blyth, Bradley S. Marino*

- Right bundle branch block as a marker for interatrial septal abnormalities

*Aurora Bakalli, Dardan Koci, Ljubica Georgievska-Ismail, Tefik Bekteshi, Epp Pllana, Bashi Sejdin*

- New York Heart Association class assessment by cardiologists and outpatients with congenital cardiac disease: a head-to-head comparison of three patient-based versions

*Dounya Schoormans, Yuna L. Mager, Frans J. Oort, Mirjam A.G. Sprangers, Barbara J.M. Mulder*

- Objectively assessed physical activity and sedentary behaviour does not differ between children and adolescents with and without a congenital heart defect: a pilot examination

*Lauren A. Ewalt, Michael J. Danduran, Scott J. Strath, Victoria Moerchen, Ann M. Stewart*

- Oral feeding outcomes in neonates with congenital cardiac disease undergoing cardiac surgery

*Sharon Sables-Bass, Jon Kaufman, Paul Cook, Eduardo M. da Cruz*

- Hyperglycaemia is negatively associated with systemic and cerebral oxygen transport in neonates after the Norwood procedure

*Genghong Zhang, Sally Cai, Jia Li*

- Quantification of left-to-right shunt through patent ductus arteriosus by colour Doppler in children admitted for a device closure

*Solweig Hartling, Tomas Jansson, Milad El-Segaier, Erkki Peuronen*

- Cardiovascular considerations of attention deficit hyperactivity disorder medications: a report of the European Network on Hyperactivity Disorders work group, European Attention Deficit Hyperactivity Disorder Guidelines Group on attention deficit hyperactivity disorder drug safety meeting

*Robert M. Hamilton, Eric Rosenthal, Martin Hulpe-Wette, John G. I. Graham, Joseph Sergeant, for the European Network of Hyperkinetic Disorders and the Association of European Paediatric Cardiology*

- Device closure of atrial septal defect: medium-term outcome with special reference to complications

*Masood Sadig, Tehmina Kazmi, Atif U. Rehman, Farhan Latif, Najam Hyder, Shakeel A. Qureshi*

- The evaluation of carotid intima-media thickness in children with beta-thalassaemia major

*Mustafa Dogan, Elvan Caglar Citak*
Table of Contents  continued

IMAGES IN CONGENITAL CARDIAC DISEASE
Postnatal evaluation of thoracopagus conjoined twins by 64-slice computed tomography
Javier Courtis, Ernesto Juaneeda 84
Double-chambered ventricle appearance of isolated congenital left ventricular diverticulum
Samo Voeel, Pavel Berden 87
Three-dimensional transthoracic echocardiography to evaluate surgical removal of subaortic membrane
Pierre-Emmanuel Ségucla, Xavier Alacqua, Philippe Acar 89

BRIEF REPORTS
Critical coarctation in an extremely low birth weight pre-term infant
Transcatheter closure in two rare cases of left-to-right shunt with Cardio-O-Fix occluders
Jacek Bielakowski, Celal Akdeniz, Ahmet Celebi 96
One tear may hide another: anomalous origin of the left coronary artery from the pulmonary artery revealed by supraventricular tachycardia
Thomas Cognet, Pierre-Emmanuel Ségucla, Philippe Acar 100

Atrial septal defect repair by inversion of a juxtaposed left atrial appendage
Nicholas D. Anderson, Jay D. Pali, Andrew J. Lodge 103
Transcatheter closure of a large left ventricular pseudoaneurysm using an Amplatz Vascular Plug 4 and stenting of the inferior caval vein in a child
Osman Baspinar, Ahmet Mete, Vedat Davutoglu 106

Use of a self-expanding custom-made stent graft to treat lateral tunnel leak, stenosis, and fenestration in the Fontan pathway
Sucharitha Chadalavada, Soodevi Boolkab, Benjamin Gregory Smith 110

d-Transposition of the great arteries in a 12-year-old child: is arterial switch still an option?
Jayaramanath Mahima, Desavanada Nityagjal Shivanna, Anand Subramanian 113

Prenatal complex congenital heart disease with Loeys–Dietz syndrome
Yukiko Kawazu, Noboru Inamura, Futoshi Kayatani, Nobuhiko Okamoto, Hiroko Morisaki 116

CORRIGENDUM
Cardiovascular considerations of attention deficit hyperactivity disorder medications: a report of the European Network on Hyperactivity Disorders work group, European Attention Deficit Hyperactivity Disorder Guidelines Group on attention deficit hyperactivity disorder safety meeting –
CORRIGENDUM
Robert M. Hamilton, Eric Rowenthal, Martin Hulhe-Witte, John G. I. Graham, Joseph Sergeant 120

Instructions to Authors

CARDIOLOGY IN THE YOUNG

Submission to Cardiology in the Young is exclusively via the web-based peer-review system, CTY Manuscript Central. Online submission enables rapid review and allows online manuscript tracking. We invite all authors to submit online any NEW MANUSCRIPTS that are to be considered for publication in Cardiology in the Young. Please use the following URL: http://mc.manuscriptcentral.com/cty

Editorial policies

Cardiology in the Young is devoted to cardiovascular issues affecting the young and the older patient with the sequelae of cardiac disease acquired in childhood. Submission of both basic research and clinical papers is encouraged. Articles on fundamental principles will also be considered for publication. Reviews on recent developments are welcome. The Journal serves the interest of all professionals concerned with these topics. By design, the Journal is international and multidisciplinary in its approach, and the members of the Editorial Board take an active role in the Journal’s mission. Prospective authors are encouraged to consult with the editors and members of the Editorial Board with any inquiries. The editors encourage the submission of articles from developing countries.

Articles should be concerned with original research not published previously and not being considered for publication elsewhere. Submission of a manuscript to the Journal gives the publisher the right to publish that paper if it is accepted, and the copyright of the manuscript becomes property of the publisher. Manuscripts may be edited to improve clarity and expression. Authors must ensure that their studies comply with appropriate institutional and national guidelines for ethical matters. Specifically, by submission of a manuscript, the authors are responsible for compliance with guidelines and regulations of the authors’ institution and all appropriate governmental agencies.

Articles including human subjects must include a statement that informed consent was obtained and that the study was reviewed and approved by the institution’s committee on human experimentation. Articles including animal experimentation must conform to the principles of the American Physiological Society, and a statement acknowledging conformation to these standards must be included in the Materials and methods section of the manuscript. Authors are also requested to identify possible conflicts of interest, especially as it relates to commercial sponsorship or equity holdings.

Language

The language of the Journal is English, but acceptance of a manuscript will reflect scientific rather than grammatical content. The editors undertake to facilitate the publication of papers from those authors whose native language is not English.

Manuscripts

Manuscripts should be submitted via the web-based peer-review system, CTY Manuscript Central and must include a complete set of Figures. Further information regarding Figure formats is outlined below. Type all pages with double-spacing and wide margins on all pages, with left justified margins. Divide the manuscript into the following sections: Title Page, Abstract, Keywords (3–6), Introduction, Materials and methods, Results, Discussion, Acknowledgements, References, Tables, Figure legends and Figures.

Cover letter

A submission letter is required for all papers. A submission letter template will be attached to the confirmation email that the author will receive after completing online submission.

Authorship

Authorship should be assumed only by those workers who have contributed materially to the work and its report, and who accept the responsibility for the accuracy of the concepts expressed. Colleagues who have otherwise assisted or collaborated should be recognized in the section for acknowledgements. An excellent guide to authorship is given by the Style Manual Committee of the Council of Biology Editors, and the editors encourage consultation with this source.

Style

The Journal uses the English language, it does not use Latin terms such as ‘superior vena cava’. Anatomic terms should be given in the English language. Do not use abbreviations or symbols. Submissions including Latin terms, abbreviations or symbols will be returned to the corresponding author for correction before they can be accepted for peer review. Headlines and subheadings should be liberally employed in the methods, results, and discussion sections. Use short paragraphs whenever possible. The authors should strive for clarity of expression, avoiding, in particular, the use of jargon. Authors should also avoid conventions such as...
Group 1, Group 2, and so on, using descriptive titles rather than alphanumeric codes.

Title page

Follow the on-screen instruction on CTY Manuscript Central to enter each piece. The title page should include a descriptive title, a running head title not to exceed 50 characters (and with no abbreviations), authors’ complete names (first names and initials followed by family name), academic addresses, corresponding author (with full address, telephone and fax numbers, and email address), keywords (3–6 for indexing purposes and words not used in main title of article), and all sources of financial support, including grants from non-profit organizations and/or any commercial support. Please note that author qualifications should not be included on the authors list on the title page.

Abstract

The Abstract should be no more than 250 words and should include statements identifying relevant methods and results justifying publication. Do not use abbreviations or symbols.

Introduction

The Introduction should be brief and set out the purposes for which the study has been performed. It should not include an extensive review of the literature.

Materials and methods

The Materials and methods should be sufficiently detailed so that readers and reviewers can understand precisely what has been done without studying the references directly. The description may be abbreviated when well-accepted techniques are used with appropriate reference to previously published methods. Statements confirming conformation to institutional and governmental review of the experimental protocol (see above in the Editorial policies section) should be included here.

Results

The results should be presented precisely. Reference to Tables and Figures, to the extent that they contribute substantively to help the reader understand clearly the relevant positive and negative findings, is encouraged.

Keep discussion of their importance to a minimum in this section of the manuscript.

Discussion

The Discussion should relate directly to the study being reported. The Discussion should interpret the results, should describe the relevance of the results, and should include a discussion of the limitations of the study. Do not include a general review of the topic.

Acknowledgements

Acknowledgements should follow the discussion.

References

References should be numbered consecutively (in superscript) as they appear in the text. Type the reference list with double-spacing on a separate sheet. References (using Index Medicus abbreviations) should appear in the style as demonstrated below. Please note that if more than six authors, the first three authors should be listed and then ‘et al.’. Examples:

Tables

Tables should follow the style as demonstrated in issues to date, and be essential to the understanding of the text. Tables should have short descriptive titles and should be numbered (1, 2, 3 etc.) as they appear sequentially in the text. If only one Table is included, it should be referred to as Table. Submit each Table on a separate sheet of paper. All abbreviations and symbols should be defined in a footnote below the Table.

Figures

Authors are not charged for colour printing costs.

Please ensure that all graphs are exclusively submitted as 2-dimensional images.

To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures.

Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal.

Line artwork

Format: tif or eps

Colour mode: black and white (also known as 1-bit)

Resolution: 1200 dpi
Combination artwork (line/tone)
Format: tif or eps
Colour mode: grayscale (also known as 8-bit)
Resolution: 800 dpi

Black and white halftone artwork
Format: tif
Colour mode: grayscale (also known as 8-bit)
Resolution: 300 dpi

Colour halftone artwork
Format: tif
Colour mode: CMYK colour
Resolution: 300 dpi

If you require any further guidance on creating suitable electronic figures, please visit http://dx.sheridan.com/guidelines/digital_art.html. Here you will find extensive guidelines on preparing electronic figures and also have access to an online pre-flighting tool (http://dx.sheridan.com/index.html) where you can check if your figures are suitable for reproduction.

Supplementary On-line Material
The online platform gives authors the opportunity to include data that would be impossible or impractical to include in the printed version. These data might substantially enhance the importance of the research and might also be of benefit to readers. Authors may include tables and figures as well as data such as videos, 3-D structures/images, extensive datasets and any other supplementary material not suitable for print duplication. All supplementary material must be submitted with the original manuscript. Supplementary data should be referred to in the text with the prefix “S” (e.g. Supplementary Table S1, Supplementary Figure S1). Supplementary files will not be copy-edited, and will be published as supplied.

Case Reports/Brief Reports
Case Reports which add important new information will be published as Brief Reports. Articles published in this section should have no more than three authors, 1,000 words, an abstract (of about 60 words), 3–6 key words, two Figures or Tables, and 10 references.

Editorials and Letters to the Editor
Readers are encouraged to write about any topic that relates to cardiology in the young. Such letters will appear in Letters to the Editor. They should be no longer than 500 words. Editorials are written on invitation but unsolicited articles of approximately 1,500 words which may have particular topical interest will be welcomed for consideration.

Reviews
Reviews of recent developments are welcome. Authors are encouraged to contact the editor to determine the appropriateness for inclusion.

Images in Congenital Cardiac Disease
Definitive, unique, or extraordinary pictures of any aspect of congenital cardiac disease will be presented with an accompanying legend of not more than 250 words (one double-spaced page). A maximum of three authors and one reference may be included. Instruct-}

ational value and artistic merit will be considered in addition to scientific import and clinical relevance. Authors will not be charged colour printing costs.

Offprints
Article offprint order forms will be sent to the corresponding author with the proofs. If you do not receive the relevant form please email the Production Editor at: nmarshall@cambridge.org

Reprints
Article reprints (following publication) are available from special_sales@cambridge.org. A minimum reprint order of 500 copies is required.

Permission
Requests for permission to reproduce any material originally published in Cardiology in the Young should be sent to the Permissions Manager at lnicol@cambridge.org

Announcements
Meetings and courses will be announced in each Issue. Refer to the Announcements Section for appropriate guidelines. Please email details to: ctyedoffice@cambridge.org The Journals homepage, www.journals.cambridge.org/cty, offers paying advertisers the opportunity to promote conferences/courses and recruitment vacancies (subject to editorial approval). For rate details please email: ad-sales@cambridge.org

Page changes
Page changes will not be made once proofs are prepared for publication.

Articles not conforming to these instructions will be returned to the corresponding author for correction, and will delay review and publication.

(Revised January 2011)
