generate deep social consequences that mark human life. Managing a human disaster remains a challenge for the health policy in Brazil. The difficulties faced are related to the lack of interface with other public policies. The urgency to incorporate intervention/action strategies into health plans is important. Implementation of prevention and training programs, and adopting strategies and protocols for the whole network of attention is critical.

**Discussion:** It is important to emphasize the importance of broadening the theoretical definitions by overcoming the divergences of the concepts adopted between the theoretical and operational field, by elaborating a review of the Brazilian legislation in order to broaden and contemplate the needs of different people.

2. Royal Darwin Hospital Pharmacy Department, Tiwi, Australia

**Introduction:** It is a requirement for a World Health Organization verified Emergency Medical Team (EMT) that all members be immunized against common diseases in the deploying region. Most jurisdictions use private suppliers such as travel doctors for immunization services. When a deployment is announced, members are nominated by their jurisdiction under the condition they are fully immunized. It is up to the individual to monitor their immunization status.

**Aim:** To determine how many members nominated for deployment were fully immunized.

**Methods:** Nominated members sent their completed vaccination record to a central location for assessment of their immunization status. The following data were recorded: vaccination...
