

British Journal for the History of Science

Instructions for Contributors

The *British Journal for the History of Science* (BJHS) is the journal of the British Society for the History of Science, the major national body for this subject in Britain. One of the premier journals in the field, it publishes high quality papers and review articles in all aspects of the history of science. There are four issues per year comprising an annual volume of more than 500 pages. BJHS also includes an extensive book review section. Occasional thematic issues are published on important problems or topics.

Contributions are very welcome. They should be sent to the BJHS Editor's Administrative Assistant, Mrs Trish Hatton, by email to bjhsassistant@btinternet.com. Other inquiries should be sent to the BJHS Editor, Prof Charlotte Sleigh, School of History, Rutherford College, University of Kent, Canterbury, Kent, CT2 7NX, email: C.L.Sleigh@kent.ac.uk. They are considered on the understanding that they are unpublished and are not on offer to another journal. Contributions should be submitted in electronic form as an email attachment, preferably in MS Word format. Article length should not ordinarily exceed 10,000 words, including footnotes and references, except by special prior arrangement with the editor.

Texts should be double spaced with a margin. Always include an abstract of 150–200 words. Long quotations should be inset. Short quotations should be given single quotation marks. Spelling should follow the *Oxford English Dictionary*. All papers should be rigorously documented. References to primary and secondary sources must be set as endnotes, not as footnotes, and typed in double spacing and numbered consecutively. Keep endnotes to a maximum of one per sentence, with their markers placed if at all possible at the end of the sentence. It is advised that op. cit. are left open ('op. cit. (xxx)') as their placement in the order of endnotes is likely to change in the process of revisions. The numerical reference can be added at the final stage after editing by the Editor.

Brief indication of how to cite sources is as follows:

1. Boris Smetov and Dmitri Blogschi, *Chemistry in the Eighteenth Century*, 2nd edn (tr. Robert Roe), 5 vols., Edinburgh: Edinburgh University Press, 1886–1914, vol. 3, p. iii, pp. 237–238.
2. John Doe, 'Searching for gravity waves', in Andrew Burn and Zigmund Trent (eds.), *The History of Physics*, Oxford: Oxford University Press, 1982, pp. 22–24.
3. Doe, op. cit. (2), pp. 23–24.
4. Nicodemus Brown, 'Developments of the cathode ray', *Journal of Physics* (1972) 7, pp. 25–31. Spell out journal titles. Give complete page run of articles cited and, where appropriate, the page number to which the citation refers.
5. John Herschel to George Peacock, 17 May 1836, Herschel Papers, Royal Astronomical Society, London (subsequently HP), Box 1234, 56. For manuscript sources please supply whatever

information is necessary for the reference to be found. Subsequent references can be cited by name, date, abbreviated source, box, page or folio number.

Images should be of high quality and submitted electronically as jpg, tif or eps files, and sent by email or via a file download service if large. The place of the illustration should be indicated in the margin of the text. Type captions on a separate Word file and include full details of the sources. Permission to reproduce material is entirely the author's responsibility and should be cited where given.

Charges apply for all colour figures that appear in the print version of the journal. At the time of submission, contributors should clearly state whether their figures should appear in colour in the online version only, or whether they should appear in colour online and in the print version. There is no charge for including colour figures in the online version of the Journal but it must be clear that colour is needed to enhance the meaning of the figure, rather than simply being for aesthetic purposes. If you request colour figures in the printed version, you will be contacted by CCC-Rightslink who are acting on our behalf to collect Author Charges. Please follow their instructions in order to avoid any delay in the publication of your article.

The editor requires the final agreed version of the manuscript to be supplied double spaced and always in electronic form as a Word document with appropriate electronic artwork files. Place your institutional address and acknowledgements at the end of your paper before the notes. Do not include acknowledgements or your own address as part of the first note.

Joint contributors should note that proofs and order forms for offprints will be sent to the first named author unless the Editor is otherwise informed.

© British Society for the History of Science. The British Society for the History of Science retains copyright for all articles published. It is the author's responsibility to secure any necessary permission for publication. Single copies of articles may be made for research or private study. Permission to make multiple copies must be obtained from the Society. Authors receive twenty-five offprints of articles free. Typescripts are not normally returned to authors. In all matters concerning the publication of the article, the Editor's decision is final. The Editor, Editorial Board and Council of the Society cannot accept responsibility for any views expressed by contributors in articles published by the Journal.

Please visit <http://journals.cambridge.org/openaccess> for information on our open access policies, compliance with major funding bodies, and guidelines on depositing your manuscript in an institutional repository.
