6. Illustrations
7. Proofreading
8. Offprints

Scope

The *Review of Symbolic Logic* is designed to cultivate research on the borders of logic, philosophy, and the sciences, and to support substantive interactions between these disciplines. The journal welcomes submissions in any of the following areas, broadly construed:

The general study of logical systems and their semantics, including non-classical logics and algebraic logic;

Philosophical logic and formal epistemology, including interactions with decision theory and game theory;

The history, philosophy, and methodology of logic and mathematics, including the history of philosophy of logic and mathematics;

Applications of logic to the sciences, such as computer science, cognitive science, and linguistics; and logical results addressing foundational issues in the sciences.

The Review welcomes submissions in all these areas. (For information on how to submit papers, see Guidelines below.) The Review began publication in June 2008.

Submission of manuscripts

Papers must be submitted electronically via the journal's online submission system, <http://asljournals.org/logon.php>.

If you are new to this system, please register at this site as directed. You will then be taken to your "Projects" page. Click on the button at the top of the page titled "New Submission" and follow the instructions. First choose the Review of Symbolic Logic from the Journal pull down list; afterwards please upload the files for your submission. Authors who prefer blind refereeing are invited to prepare their papers accordingly. Finally, the managing editor will assign an editor for your article. Normally we are able to get back to authors with a first verdict after a period of three months or less.

The preferred file format for submissions is PDF, though other types (Postscript, .dvi, Word) are acceptable if PDF is not an option. The recommended way of creating the file is through LaTeX, as it can also be used for typesetting the final paper; see below.

For more information see <http://www.aslonline.org/journals-review-guide.html>.

If you cannot get the system to work or experience difficulties, please email aslpub@math.cornell.edu with a description of the problem.

Papers already in progress will continue to be handled under the old system.

Electronic manuscripts

The publisher encourages submission of manuscripts written in LaTeX which can be used for direct typesetting. Authors using LaTeX should use the RSL LaTeX class file. This, along with related files, can be found [here](#) (zip file download). If you have difficulties obtaining these files please contact texline@cup.cam.ac.uk. While use of the RSL LaTeX class file is preferred, plain LaTeX or TeX files can also be accepted.

Layout of manuscripts

Manuscripts should begin with an abstract of not more than 300 words. Papers should conform to a good standard of English prose; please consult a style guide such as 'The Elements of Style' by Strunk and White, Macmillan, New York. It is encouraged to present programs in one of two styles: either with identifiers in italic and keywords in bold, or entirely in a fixed-width teletype font. Do not begin a sentence with a symbol or identifier name. Please supply Web URLs for the home page of each of the authors of the paper.

References

The Harvard system of references should be used. Citations are by author's surname and year of publication, and may stand either as a noun phrase (e.g., "Curry (1933)") or as a parenthetical note (e.g., "(Curry 1933)"). List references at the end of the text in alphabetical order. A typical entry is: Curry, H.B. (1933) Apparent variables from the standpoint of mathematical logic, *Ann. of Math.*, 34 (2): 381-404.

Illustrations

Figures should ideally be supplied electronically with captions embedded. Otherwise they must be drawn in indian ink on good quality white paper. Wherever possible they will be reproduced with the author's original lettering. Originals of figures should not be sent until the paper has been accepted. A list of captions for figures supplied as hardcopy should be attached separately.

Proofreading

Only typographical or factual errors may be changed at the proof stage. The publisher reserves the right to charge for correction of non-typographical errors. No page charge is made. RSL policy is to follow the spelling convention (American or British) of the author(s).

Offprints

No paper offprints are provided, but the corresponding author will be sent a link to the pdf of the published article.
