Modern American History

cambridge.org/core/journals/modern-american-history

Modern American History (MAH) showcases top-quality, emerging research on the history of the United States since the 1890s. Establishing a long-overdue meeting place for scholars and practitioners working in this vibrant and expansive field, MAH aims to stimulate debate, make meaningful connections between subspecialties, and advance understanding about an era of continuing impact.

An overarching set of developments and key problems now animate the field of modern American history, setting it apart from earlier eras and making the prospect of a dedicated journal especially timely. Themes include, though are not limited to, the creation of a modern state; the rise and decline of an industrial political economy; the emergence of the U.S. as a world power; rising consumer expectations and life expectancy; accelerating technological and environmental change; the transformation of urban, suburban, and regional landscapes; mass migration amid new legal regulations and border regimes; and the elaboration of modern forms of political rights and personal identity, including beliefs about how race, gender, class, religion, health, and sexuality inform the national experience. MAH creates a "big tent" arena for broadly inclusive and trailblazing conversations about this recent past.

History – New Launch

P ISSN: 0009-8558

E ISSN: 1471-8030

Frequency: 4 issues per year

Global Sustainability

cambridge.org/core/journals/global-sustainability

Global Sustainability is a new Open Access journal dedicated to supporting the rapidly expanding area of global sustainability research. Without profound societal transformations, humanity risks destabilising the Earth system. In the last decade, the research field of global sustainability science has expanded rapidly to explore human social and economic pressure on the whole Earth system. This journal will explore global sustainability, planetary and societal resilience, and solutions for societal transformations.

Global Sustainability will publish interdisciplinary original research, reviews and commentaries addressing how human activities interact with Earth system dynamics. It will invite work on sustainable pathways, evolution and resilience in the Anthropocene.

Earth and Environmental Sciences – New Launch

Volume: 1

Institutions E only price: Open access

E ISSN: 2059-4798
