**British Expeditionary Warfare and the Defeat of Napoleon, 1793-1815**
*Robert Sutcliffe*

Britain’s naval victories in the French Revolutionary and Napoleonic Wars succeeded in protecting Britain from French invasion, but they could not of themselves defeat France. This required the shipping of large numbers of troops to, and successfully landing them on, French controlled territory – a major logistical operation. Wellington’s expedition to Portugal and Spain led to Napoleon’s defeat in the Peninsular War, but there were many other British expeditions before this which were not successful, in part because they were too logistically ambitious. This book examines in detail the logistical operations which supported British expeditionary warfare in the period.

**Georgian Gothic: Medievalist Architecture, Furniture and Interiors, 1730-1840**
*Peter Lindfield*

The Gothic Revival, rich, ambitious, occasionally eccentric, but nonetheless visually exciting, is one of Britain’s greatest contributions to early modern design history, not least because for the most part it contravened approved taste: Classicism. Scholars have tended to treat Georgian Gothic as an homogenous and immature precursor to “high” Victorian Gothic, and centred their discussion around Walpole’s Strawberry Hill. This book, conversely, reveals how the style was imaginatively and repeatedly revised and incorporated into prevailing eighteenth-century fashions: Palladianism, Rococo, Neoclassicism, and antiquarianism.

Millions of people worldwide lack adequate access to medicines, particularly in developing countries where resources are scarce with devastating human, social and economic consequences. The example of HIV/AIDS, for which treatment has advanced so significantly in the last decade that a diagnosis no longer necessarily brings with it a death sentence, highlights the importance of ensuring that essential medicines are affordable and accessible to all. This book focuses on one aspect of access to medicines: the affordability of essential medicines, and its connection to human rights and patents.
