

An Introduction to Astrobiology

Edited by David A. Rothery,
Iain Gilmour and Mark A. Sephton

Authors:

Andrew Conway

Iain Gilmour

Barrie W. Jones

Manish R. Patel

David A. Rothery

Mark A. Sephton

John C. Zarnecki

CONTENTS

CHAPTER 1 ORIGIN OF LIFE

1

Mark A. Sephton

1.1	What is life?	1
1.2	The building blocks of life	4
1.3	How to study the origins and remains of life	13
1.4	Organic matter in the Universe	14
1.5	Synthesis of organic molecules on the early Earth	18
1.6	Delivery of extraterrestrial organic matter to the early Earth	21
1.7	Achieving complexity	30
1.8	From chemical to biological systems	35
1.9	The top-down approach – molecular phylogeny	37
1.10	A synthesis on the origins of life	40
1.11	Summary of Chapter 1	41

CHAPTER 2 A HABITABLE WORLD

43

Iain Gilmour

2.1	Introduction	43
2.2	Defining a habitable planet	44
2.3	Habitable zones	45
2.4	The environment on the early Earth	54
2.5	Life on the edge	74
2.6	Extreme environments	80
2.7	Summary of Chapter 2	83

CHAPTER 3 MARS

85

David A. Rothery and John C. Zarnecki

3.1	Introduction: Mars and life	85
3.2	Background	88
3.3	Viking: the first search for life	96
3.4	Water, water everywhere?	99
3.5	The ALH 84001 story: evidence of life in a Martian meteorite?	116
3.6	Planetary protection	120
3.7	Habitats for life	123
3.8	Summary of Chapter 3	125

CHAPTER 4 ICY BODIES: EUROPA AND ELSEWHERE

127

David A. Rothery

4.1	Introduction	127
4.2	Europa	141
4.3	Other icy bodies as abodes of life?	166
4.4	Summary of Chapter 4	170

CHAPTER 5 TITAN

171

Manish R. Patel and John C. Zarnecki

5.1	Introduction	171
5.2	Observations	171

5.3	Titan's atmosphere	174
5.4	Titan's surface	188
5.5	Titan's interior	196
5.6	Summary of Chapter 5	198
CHAPTER 6 THE DETECTION OF EXOPLANETS		199
<i>Andrew Conway</i>		
6.1	Introduction	199
6.2	Reflected radiation	202
6.3	Emitted radiation	209
6.4	Absorbed or occulted radiation	211
6.5	Refracted radiation	214
6.6	Movement of the star	219
6.7	Observables and important properties	229
6.8	Summary of Chapter 6	231
CHAPTER 7 THE NATURE OF EXOPLANETARY SYSTEMS		233
<i>Barrie W. Jones and David A. Rothery</i>		
7.1	The discovery of exoplanetary systems	233
7.2	Properties of exoplanetary systems	235
7.3	Migration of exoplanets within exoplanetary systems	247
7.4	The undiscovered exoplanets	253
7.5	Summary of Chapter 7	258
CHAPTER 8 HOW TO FIND LIFE ON EXOPLANETS		261
<i>Barrie W. Jones</i>		
8.1	Potential planetary habitats	261
8.2	How to find biospheres on exoplanets	264
8.3	Summary of Chapter 8	280
CHAPTER 9 EXTRATERRESTRIAL INTELLIGENCE		281
<i>Andrew Conway</i>		
9.1	Introduction	281
9.2	Searching – SETI	281
9.3	Communication – CETI	290
9.4	The search to date	296
9.5	Final thoughts	298
9.6	Summary of Chapter 9	302
