

# Environment policy

We have a responsibility to protect the environment, and are committed to continually improving our environmental performance throughout our operations and supply chain.

## Scope

This policy applies to all Cambridge University Press & Assessment activities, products and services. All colleagues should be aware of our environmental policy, and relevant objectives and targets.

Colleagues should be mindful of their environmental impact and proactive in supporting our environmental policy, in accordance with our [Code of Ethics](#).

Our suppliers, contractors and other providers are also expected to support us in implementing this policy.

## Objectives

Our activities, products and services for the global academic and educational markets have an impact on the environment. We will reduce that impact by:

- Reducing carbon emissions in our operations and supply chain, in line with our science-based targets.
- Improving resource efficiency and reducing waste, and increasing recycling where possible.
- Protecting nature and biodiversity, including by seeking assurance from our suppliers that forestry products are legally and sustainably sourced.

- Preventing pollution, and meeting or surpassing relevant environmental legislation and regulatory controls.
- Empowering our colleagues to understand and act on our environmental policy, and using our expertise, platform, and voice to raise awareness and drive positive environmental action wherever we can.

## General principles

By regularly assessing the significance of our interactions with the environment, we will set relevant objectives and targets relating to our operations.

Our Environmental Governance Board will oversee our environmental sustainability strategies and policies, and set out our approach to these objectives and targets.

Our responsible Executive Board member is [Catie Sheret](#).

Further information about sustainability can be found on [our website](#).
