Volume 55

SEPTEMBER 1981

Supplement to No. 5

Part II of II

JOURNAL OF PALEONTOLOGY

THE PALEONTOLOGICAL SOCIETY MEMOIR 12

Late Cenozoic Stages and Molluscan Zones of the U.S. Middle Atlantic Coastal Plain

BLAKE W. BLACKWELDER

Memoirs of the Paleontological Society are occasional publications consisting of monographs and symposia that are too extensive for publication in the Journal of Paleontology as part of the regular issues. Ordinarily, memoirs are published as supplements to a regular issue of the Journal. Inquiries concerning submittal of manuscripts for inclusion in the Memoir Series may be made to the Editors of the Journal for the Paleontological Society.

Communications concerning the cost and availability of back numbers of the Memoir Series should be addressed to the Society of Economic Paleontologists and Mineralogists, P.O. Box 979, Tulsa, Oklahoma 74101.

OFFICERS OF THE PALEONTOLOGICAL SOCIETY

For the year ending November 1981

President

ARTHUR J. BOUCOT, Corvallis, Oregon

President-Elect

ERLE G. KAUFFMAN, Boulder, Colorado

Past-President

WARREN O. ADDICOTT, Menlo Park, California

Secretary

WALTER C. SWEET

Department of Geology & Mineralogy The Ohio State University

125 So. Oval Mall

Columbus, Ohio 43210

Treasurer

J. A. FAGERSTROM, Lincoln, Nebraska

Program Coordinator

ROGER D. K. THOMAS, Lancaster, Pennsylvania

Journal Co-Editors ALAN H. COOGAN and

RODNEY M. FELDMANN, Kent, Ohio

Paleobiology Editor JAMES A. HOPSON, Chicago, Illinois

Councilors

PHILIP D. GINGERICH, Ann Arbor, Michigan LEIGH VAN VALEN, Chicago, Illinois

Section Chairpersons

North-Central: WAYNE I. ANDERSON. Cedar Falls, Iowa

Northeastern: ROGER D. K. THOMAS, Lancaster, Pennsylvania

Pacific Coast: CAROLE J. HICKMAN, Berkeley, California

Southeastern: Frank, K. McKinney,

Boone, North Carolina

DEDICATION

This paper is dedicated to the staff of the Duke University Marine Laboratory. The Marine Laboratory has long served as a geological/biological research and training center for Coastal Plain workers. Founded through the efforts of Dr. A. S. Pearse in 1938 on Pivers Island near Beaufort, North Carolina, this laboratory has provided access to important onshore and offshore geo-biological features. Located close to the Outer Banks, and to various tributaries, sand beaches, dunes, and marshlands, the laboratory is well situated for studying past and present depositional processes. The Cooperative Oceanographic Program initiated at the Marine Lab has given researchers throughout the United States access to the EASTWARD, a research vessel supported by the National Science Foundation. The Marine Laboratory and its staff have afforded many individuals the rich and rewarding opportunities of studying modern and ancient environments. These opportunities have enabled students to gain a depth of understanding and a perspective of the marine environment and of geological processes that would otherwise not have been possible.

CONTENTS

Abstract	1
Introduction	1
Methods	1
Previous Work	4
Depositional History	4
Wiltonian Stage (M6) (Pliocene)	5
Burwellian Stage (M5) (Pliocene)	6
Colerainian Stage (M3–4) (Pliocene–Pleistocene) Gouldian Substage (M4) (Pliocene) Windyan Substage (M3) (Pleistocene)	13
Longian Stage (M1–2) (Pleistocene–Holocene) Myrtlean Substage (M2) (Pleistocene) Yongesian Substage (M1) (Pleistocene–Holocene)	28
