On page 6 (Graham 2019), Equation 24 contains an error such that  $0.5 \log(\pi)$  was added rather than subtracted after substituting Equations 18 and 19 into Equation 23. As such, the value  $-7.065$  in equation 24 should read  $-7.563$ . This correction has no consequences on any other aspect of the article, with the correct value of  $-7.563$  used to derive equation 25.
